

Principal Pharmacometrics Scientist

Job ID REQ-10017569

8月 11, 2025

United Kingdom

摘要

-Leads the execution and delivery of pharmacometrics tasks on assigned projects within (early/full) clinical development. Together with the leadership, s/he is responsible for the discussion and implementation of pharmacometric methodologies that optimally address the research and development objectives on assigned projects.

About the Role

Our Development Team is guided by our purpose: to reimagine medicine to improve and extend people's lives.

To do this, we are optimizing and strengthening our processes and ways of working.

We are investing in new technologies and building specific therapeutic area and platform depth and

capabilities - all to bring our medicines to patients even faster.

We are seeking key talent, like you, to join us and help give people with disease and their families a brighter future to look forward to.

Apply today and welcome to where we thrive together!

The Role

As a Principal Pharmacometrics Scientist you will be responsible for the discussion and implementation of pharmacometrics methodologies that optimally address the research and development objectives on assigned projects.

Key Accountabilities:

- You will lead the execution and delivery of pharmacometrics tasks on assigned projects within (early/full) clinical development.
- You will partner with Novartis Institute for Biomedical Research, Pharmacometrics
 Development Unit leader and senior pharmacometrics associates to negotiate and develop
 pharmacometrics objectives and deliverables.
- You will partner with colleagues in (early/full) Global Project Teams providing
 pharmacometrics support for the quantitative evaluation of competing trial/analysis strategies
 assuring robust support to clinical development planning and execution and alignment with
 clinical development plans and target product profiles.
- You will collaborate closely with the Analytics team (biometrician, data management, database programming, programming, medical and scientific writing) on the pharmacometrics strategy and execution on assigned projects.
- You will contribute to the pharmacometrics scientific content of materials for internal decision boards/regulatory/submission documents: Briefing Books, decision criteria, trial design(s), responses to trial-specific Health Authority questions.
- You will promote the use of innovative methods within the organization, through scientific collaborations, publications in scientific peer reviewed journals and presentations at professional meetings.

Your Experience

- Ph.D. in pharmacology, biology, engineering, mathematics, statistics, or a field with significant modeling-related content (or equivalent).
- Experience in modeling related activity relevant to the role as a pharmacometrician.
- Sound knowledge with SAS / R / MATLAB / NONMEM / Monolix or any other business or research analytic software relevant to pharmacometrics.
- scientific leadership skills demonstrated in facilitating the inclusion and execution of pharmacometrics methods.
