- Standardize cost estimations and budgeting methodologies across projects and geographies. Provide financial analyses, including cost-to-value assessments and return on investment (ROI) evaluations.
- Monitor project performance, identifying deviations and implementing corrective actions. Manage a portfolio of commercial offices projects, ensuring timely delivery, budget adherence, and quality compliance.
- Act as the primary liaison for project updates, consolidating progress reports and communicating with leadership. Incorporate external resources at due time for project execution. Coordinate cross-functional teams, including internal resources, external consultants, and suppliers.
- Develop and maintain detailed project plans, tracking milestones, risks, and dependencies. Facilitate regular meetings with project teams and steering committees, ensuring transparency and collaboration.
- Identify and mitigate financial, operational, and project-related risks. Ensure compliance with industry standards, internal governance, and regulatory requirements. Integrate sustainability initiatives into capital planning and commercial offices development.
- Oversee project safety, environmental compliance, and quality assurance. Develop and implement tools, templates, and best practices for budgeting and project management. Support transition and change management initiatives for new facilities or systems. Drive efficiency improvements and cost savings through supplier optimization and process enhancements.

Minimum Requirements:

- Between 5-8 years of experience in project management and financial planning, or related roles within commercial offices, construction, or the pharmaceutical industry.
- Proven experience managing large-scale capital projects and multi-project portfolios. Knowledge of project management and construction techniques.
- Experience in designing fit-out offices.
- Deep financial expertise in CAPEX/OPEX budgeting, forecasting, and cost control. Proficiency in project management methodologies and tools (e.g., MS Project, Primavera, Agile, Waterfall).
- Advanced skills in data analysis, reporting, and financial software.
- Excellent stakeholder management and cross-functional coordination abilities.
- Knowledge of sustainability principles and their integration into capital planning. Must have the initiative to develop functional and economical solutions to assignments. Cost control
- Strong and effective written and verbal communications (English).
