

## Data Scientist & Governance

Job ID  
REQ-10047556

4月 14, 2025

Argentina

### 摘要

Act as subject matter expert for Data Science to the local Medical Affairs team. Recommend data solutions to address evidence needs. Constant cross-functional collaborative work with Medical, Access, HEOR, Finance, Legal, Data privacy, QA, Supply and Patient Safety colleagues. Ensure latest methodologies and breakthrough technologies are implemented for Medical Affairs.

### About the Role

Major accountabilities:

- Design, implement and maintain a Data Governance & analytics program for the medical team.
- Promote a data driven decision-making process: data extraction, storage, governance, automation of processes and analysis with statistical techniques and visualization reports.

- Promote the use of new digital technologies in the medical field to solve daily challenges.
- Work together with the Business Excellence and Execution team for the implementation of management tools and visualization of KPIs.
- Definition and monitoring of KPIs that allow evaluating the performance of the business
- Segmentation and Targeting Analysis for optimization of strategic decisions before and after product launching.
- Explore the opportunities and difficulties of implementing new technology in health care and navigate the healthcare barriers from stakeholders in analyzing gaps that can be closed with technology and data.

## Ideal Background

- Education: Desired degree in relevant discipline including data science, data mining, health services research, biostatistics, business intelligence
- Languages: Advanced English
- Experience:
  - Prior experience in Data Science and Data Governance
  - Proven experience and knowledge of the scientific method, research project design, statistical analysis and scientific publication.
  - Preferably prior experience working in the Pharmaceutical Industry.
  - Digital savviness

## Competency Profile

- Team management
- Conflict resolution
- Effective communications
- Ability to work and prioritize independently
- Project management skills (planning, executing and monitoring training projects, manage multiple tasks and priorities efficiently)
- Ability to adapt and learn new technologies and tools.
- Business Mindset
- Operations Management and Execution
