

## Senior QC Specialist ( Analytical Expert)

Job ID  
REQ-10049881

6月 06, 2025

Switzerland

### 摘要

Are you someone who can display creativity in the field of analytical science & technology - with an interest in analytical lifecycle management? As a Senior QC Specialist in ChemOps you will have a leading role in driving current and future analytical control strategies for new chemical entities (including oligonucleotide projects) ensuring long-term supplies to our patients. We play a meaningful role in the late phase delivery, launch and lifecycle management of small molecule drug substances.

### About the Role

Major accountabilities:

- Analytical project lead for launch and lifecycle management of projects in collaboration with multiple partners
- Manage product specifications including the design, development, validation, transfer and performance monitoring of analytical procedures/technologies

- Inspire analytical and process innovation. Drive and implement the improvement of scientific, regulatory and quality standards
- Ensure training according to cGMP requirements
- Maintain excellent planning and collaboration with project team members (e.g. laboratory analysts, production specialists, manufacturing science and technology, quality assurance, regulatory CMC, project leaders and colleagues)
- Design and plan analytical experiments. Interpret and report results in preparation for timely delivery of project milestones
- Support change control, preparation of the regulatory dossier and health authority inspections
- Support root cause investigations (deviations / OOX)
- Apply your knowledge and expertise by providing training and mentoring to empower colleagues.

Education:

MSc or PhD in analytical chemistry, organic chemistry or related field + 5 years industry experience

Languages :

- German
- English.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you.
