

Internship Pharmaceutical Development (Solid Oral Dosage Forms) 12-18 Months

Job ID
REQ-10051207

5月 08, 2025

Switzerland

摘要

In pharmaceutical development, we develop new medicines for patients and implement innovative pharmaceutical technologies to make a difference to patients around the world. To do this, we are optimizing and strengthening our processes and ways of working. We are investing in new technologies, data & digital, and building specific therapeutic areas and platform depth and capabilities - all to bring our medicines to patients even faster.

About the Role

As an Intern (12 to 18 months) within this innovative environment you will contribute to elaborate pharmaceutical processing technologies in the field of Solid Oral Dosage forms and to develop pharmaceutical formulation know-how for novel technologies. The internship which will offer you insights and learning opportunities into pharmaceutical development within a relevant industrial

setting. Your work will be lab / technicum based and focused on the development and characterization of dosage forms and their components, and how this translates to the production of innovative pharmaceuticals.

We are looking for a passionate individual like you to join our team, helping to create a brighter future for people living with diseases and their families.

Apply today and we can thrive together!

Preferred start date: July 1st, 2025

Latest start date: August 1st, 2025

Duration: 12-18 months

Please attach a cover letter explaining your motivation for this position and please indicate your possible starting date and duration within the application. Thank you very much.

Please note that we can only accept applicants who are eligible to work in Switzerland or have completed their studies at a Swiss University

Key Responsibilities:

- Support the formulation and process development for oral drug products and perform feasibility trials to advance the assessment and innovation of new technologies, under supervision of an experienced team member
- Perform related work in our galenical lab (non-GMP) incl. characterization of material properties
- Utilize data digital tools (e.g. e-Lab Journal, digital IPC data handling, digital data recording, data visualization tools)
- Provide raw data documentation, evaluation and interpretation of results incl. presentations at internal meetings.
- Propose and provide input for the design of next experiments
- Adherence to quality, quantity, and timelines for all assigned tasks.
- Adherence to Novartis standards, in particular, quality, ethical, health, safety, and environment (HSE), and information security (ISEC) standards.

Essential Requirements:

- You have a recent degree in Pharmaceutical Sciences, Pharmaceutical Engineering, Chemical Engineering or a related discipline (e.g. MSc, or BSc or a College of Applied Science Diploma or equivalent).
- Good scientific or technical knowledge in galenics / pharmaceutical technology / formulation-

and/or process development

- Special interest in formulation, pharmaceutical technology/processing and/or physicochemical properties / pharmaceutical material including curiosity and interest in performing lab work
- Ideally you have already experiences in working with active ingredients in a lab setting incl. experience with related HSE principles
- Ideally you have already experience or general digital severity in actively applying data-digital tools like e-LabNotebook, digital documentation and data recording tools
- Excellent Communication and organizational skills with respect to planning and tracking of commitments
- Languages: Proficiency in English (oral and written) required, German skills are advantageous
