

## Medical Safety Lead - Neuroscience

Job ID  
REQ-10056678

7月 18, 2025

Switzerland

### 摘要

Join Novartis and be a part of something extraordinary!

You will have a profound impact as a Medical Safety Lead. You'll spearhead safety evaluations, collaborate with dynamic global teams, and craft regulatory strategies that not only protect patients but also drive groundbreaking medical innovations.

### About the Role

#LI-Hybrid

Location: Basel, Switzerland

Work Model: Hybrid working model

Relocation Support: Novartis is unable to offer relocation support; please only apply if the location is accessible for you.

## Key Responsibilities

- Monitor clinical safety data, literature, and case reports to identify potential safety signals
- Collaborate with cross-functional teams on clinical safety deliverables and study documentation
- Perform signal detection and evaluation using aggregate and single-case data
- Contribute to regulatory responses and prepare safety data for health authority reviews
- Support safety input for core data sheets and related regulatory documentation
- Provide medical input for aggregate safety reports and risk management plans
- Offer expert evaluation on adverse event reports and guide pharmacovigilance operations
- Conduct medical assessments for individual cases, including follow-ups and quality defect evaluations

## Minimum Requirements:

- Bachelor of Science in Pharmacy, Nursing, PharmD, or PhD in a relevant field
- Fluent in spoken and written English; additional language skills are a plus
- Minimum 5 years of experience in drug development, including 2 years in medical safety
- Strong knowledge of clinical trial methodology, regulatory requirements, and scientific analysis
- Proven ability to analyze, interpret, discuss, and present safety information both in writing and orally
- Experience contributing to clinical safety assessments and regulatory safety reports
- Strong interpersonal and collaboration skills, with the ability to work effectively across cross-functional and multicultural teams

## Desirable:

- Medical Degree (MBBS or MD) or PhD or equivalent would be an advantage.
- Specialization in Neuroscience is preferred. Relevant experience (e.g., clinical, postdoctoral) after graduation.
- Experience in clinical trial methodology, regulatory requirements, scientific methodology, statistics and writing of publication.
- Experience in preparing or contributing to preparation of clinical safety assessments and regulatory reports involving safety information
- Experience with (safety or others) issue management.
- Strong knowledge of clinical trial methodology, regulatory requirements, and scientific analysis

- Proven ability to analyze, interpret, discuss, and present safety information both in writing and orally
- Experience contributing to clinical safety assessments and regulatory safety reports
- Strong interpersonal and collaboration skills, with the ability to work effectively across cross-functional and multicultural teams

#### Skills:

- Clinical Trials.
- Functional Teams.
- Literature Review.
- Management Skills.
- Medical Information.
- Medical Records.
- Medical Strategy.
- Pharmacovigilance.
- Regulatory Compliance.
- Risk Management.
- Safety Science.

## Accessibility and Inclusion

Novartis is committed to working with and providing reasonable accommodation to all individuals.
