Spain

### 摘要

#LI-Hybrid

Location: Barcelona, Spain

Relocation Support: Please note that Novartis can only provide visa support for this position and is unable to offer relocation assistance. We kindly ask that you apply only if you currently reside in or have access to the location.

Step into a role where your technical expertise will shape the future of healthcare innovation. As a Technical Solution Lead at Novartis, you ' ll be at the forefront of designing and delivering impactful digital solutions that support our mission to reimagine medicine. You ' ll collaborate with cross-functional teams to bring complex ideas to life, ensuring our systems are robust, scalable, and aligned with business needs. If you're passionate about technology and driven by purpose, this is your opportunity to make a real difference on a global scale.

## About the Role

### Key Responsibilities:

- Design and deliver robust technical solutions aligned with business needs and architectural standards
- Lead end-to-end development efforts, ensuring quality, scalability, and performance
- Translate functional specifications into detailed technical designs and operational processes
- Ensure compliance with security, regulatory, and quality standards throughout delivery
- Collaborate with cross-functional teams to drive solution integration and user experience
- Provide expert technical guidance and influence stakeholders across business and IT
- Take ownership of project execution, ensuring timely and effective solution delivery

### Role Requirements

- Bachelor ' s degree in Computer Science, Engineering, or a related technical field, or equivalent experience
- Over 12 years of experience designing and delivering complex, cross-functional technical solutions
- Strong background in programming and solution architecture across diverse technologies
- Proven ability to integrate or implement commercial off-the-shelf software products
- Excellent communication skills with the ability to engage senior IT and business stakeholders
- Demonstrated ability to explain complex technical concepts to non-technical audiences
- Self-driven and capable of working independently in a matrixed, multicultural environment
- Experience in regulated industries, ideally pharmaceuticals, including computer system validation.

### Desirable Requirements:

- Experience working in Agile Scrum teams and delivering in iterative development cycles
- Familiarity with pharmaceutical industry standards and digital transformation initiatives
