

(Senior) Medical Science Liaison - Renal (National Focus)

Job ID
REQ-10057585

7月 10, 2025

Australia

摘要

Are you passionate about making a difference in patients' lives and advancing medical innovation? We are seeking a highly motivated and skilled Medical Science Liaison (MSL) to join our team, focusing on our Renal portfolio. This is a national role, with flexibility to be based out of either New South Wales (NSW) or Victoria (VIC).

As an MSL, you will serve as the critical link between our organization and the medical community, providing scientific expertise and engaging in meaningful exchanges of information. Your role will involve building and maintaining strong relationships with key stakeholders, contributing to the development and execution of medical strategies, and supporting the advancement of our Renal therapies.

About the Role

- Cultivate collaborative relationships with healthcare professionals, thought leaders, and other external stakeholders to ensure the dissemination of accurate, up-to-date scientific information.
- Act as a trusted scientific resource, supporting the Renal portfolio and contributing to healthcare professionals' understanding of our therapies.
- Provide valuable insights to internal teams regarding evolving medical trends, unmet patient needs, and the competitive landscape.
- Collaborate cross-functionally with internal stakeholders, including Medical Affairs, Clinical Development, Sales, and Marketing.
- Deliver impactful medical education and training on the Renal portfolio to healthcare professionals and internal stakeholders, as needed.
- Support investigator-initiated trials (IITs) and other research initiatives aligned with the organisational strategy.

What We're Looking For:

- Tertiary qualifications in Science, Pharmacy, Nursing, Medicine, or a related field. Advanced degree preferred (e.g., PharmD, PhD, MD).
- Previous experience as an MSL or a similar role within the pharmaceutical or healthcare industry is highly regarded.
- Expertise in nephrology, renal care, or related therapeutic areas is strongly preferred.
- Excellent communication and interpersonal skills, with the ability to engage and build trust with diverse stakeholders.
- Proven analytical skills and an understanding of clinical data and research methodologies.
- Strong organisational skills and the ability to manage multiple responsibilities across a national territory.

By joining our team, you'll play a vital role in shaping how we bring impactful therapies to healthcare providers and patients nationwide. This is an exciting opportunity to work in a dynamic environment where your passion for science, medicine, and innovation will truly make a difference.

Location: Flexible – NSW or VIC based, with national coverage required.

Travel: This role will involve regular travel to engage with stakeholders and support the needs of the portfolio.

If you 're ready to combine your scientific expertise and passion for improving outcomes in the Renal space, we 'd love to hear from you!

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients ' lives. Ready to create a brighter

future together? <https://www.novartis.com/about/strategy/people-and-culture>
