Are you ready to lead the evolution of digital platforms at a global scale? At Novartis, we're looking for a passionate Specialist in Test Automation and Kaltura Platform to shape the future of how we engage with global audiences. In this pivotal role, you'll bring deep technical expertise and strategic vision to drive innovation, governance, and seamless digital experiences. From collaborating with cross-functional teams to delivering scalable, secure, and high-performing solutions, your work will make a meaningful difference across our digital landscape.

About the Role

Key Responsibilities

- Act as Kaltura platform SME, guiding teams toward aligned technical solutions and issue resolution
- Conduct platform usage reviews and translate requirements into actionable specifications
- Provide expertise in Kaltura capabilities, fine-tuning, and integration with web platforms
- Resolve performance issues and support seamless platform operations
- Define and promote automation frameworks, standards, and governance for scalable solutions
- Collaborate cross-functionally to embed DevOps and innovation into project execution
- Create and maintain test automation scripts integrated with DevOps tools
- Prepare and manage technical specifications and version control documentation
- Support Agile sprint planning, backlog management, and precise implementation
- Drive continuous improvement across testing and deployment processes

Essential Requirements

- Bachelor's degree in computer science or a related field with over 5 years of experience
- Proven expertise in content streaming platforms and test automation practices
- Strong experience with Kaltura platform customization, configuration, and web integration
- Proficiency in JavaScript, Python, and Selenium for dynamic programming and automation
- Skilled in DevOps tools including JIRA, Confluence, Bitbucket, Jenkins, JFrog, Git, and SVN
- Excellent communication skills to convey technical concepts to diverse stakeholders
