Netherlands

摘要

Are you ready to shape the future of clinical research at Novartis? As a Clinical Research Medical Advisor, you ' ll play a vital role in driving the success of clinical trials across the Netherlands, with opportunities for cross-country collaboration and occasional travel to Denmark. You ' ll collaborate with top investigators, influence trial design, and ensure patient safety and data quality throughout the process. This is your chance to make a meaningful impact on global development programs while working in a fast-paced, cross-functional environment that values innovation and scientific excellence.

Location: Amsterdam, Netherlands #LI-Hybrid

This role is based in Amsterdam, Netherlands. While the primary location is Amsterdam, the role may involve occasional travel to Denmark and offers the possibility of cross-country collaboration. Novartis is unable to offer relocation support: please only apply if this location is accessible for you.

About the Role

Responsibilities:

- Provide expert clinical and medical leadership to ensure high-quality execution of trials across the Netherlands
- Evaluate and validate study designs, ensuring feasibility based on local medical practices and competitive insights
- Guide protocol development and ethics submissions, including tailoring informed consent forms for local relevance
- Anticipate recruitment and data quality challenges, developing proactive mitigation strategies for successful trial delivery
- Deliver comprehensive training on disease areas, compounds, and protocols to internal teams and trial sites
- Shape recruitment strategies through investigator engagement, competitive trial analysis, and patient-centric approaches
- Support regulatory inspections and audits, resolving scientific and medical issues at the country level
- Ensure compliance with safety standards, GCP, ICH, and national regulations throughout the clinical trial lifecycle

Essential for the role:

- Scientific degree in a relevant field (e.g., medicine, pharmacy, life sciences)
- Minimum 2-3 years of experience in medical affairs or clinical research environments
- Fluency in both Dutch and English, with strong written and verbal communication skills
- Proven ability to manage clinical studies and resolve complex scientific and operational challenges
- Solid understanding of clinical development processes, including ICH and GCP guidelines
- Strong project management and stakeholder engagement capabilities, with effective negotiation and presentation skills
- Demonstrate an agile mindset by setting clear priorities, collaborating openly, and using feedback to make step-by-step improvements - reflecting the core elements of Agile culture within the Dutch organization.

Desirable for the role:

- Advanced degree such as PhD or MD in a relevant scientific or medical field

Commitment to Diversity & Inclusion:

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives.
