About the Role

Location - Hyderabad #LI Hybrid

About the Role:

The PMR manager will support decision making across the organization adding value as a functional expert in designing innovative research approaches to answer key business questions and support growth by leading the development and execution of primary market research. Proactively combining information from different sources, mainly market research, to evaluate brands' performance and market trends using innovative statistical analysis techniques. Evaluating the success of marketing initiatives through market research with significant focus on ensuring tight alignment with global brand teams and country insights teams.

Key Responsibilities:

- Drive innovation and capability building, including new techniques, data sources, automation and AI to enhance process efficiency and value of Insights.
- Very strong functional leader, with the ability to influence across senior leaders in Novartis
- Understands brand teams perspectives (objectives, priorities, and support/capability requirements)
- Lead experimentation and worldwide adoption of innovative PMR solutions
- Consistently monitor execution of PMR projects to support performance and growth of key brand strategies across Novartis
- Design and execute primary market research to surface and deliver insights to brand teams
- Establish expectations and approaches to better understand and impact patient journeys
- Drive a continuous improvement mind-set within the team in relation to data analysis
- Plan and design market research analyses based on a sound understanding of the research tools, techniques, datasets, and resources available and their use at various stages of the 'product life-cycle'
- Provide effective guidance to planning of studies, including research material design
- Input and guide report structure to illustrate complex analysis in user friendly and easy to digest way
- Provide alternative proposals/different approaches and suggestions for optimization of approach and synergies with other studies executed or planned
- Implement and execute studies on local, regional & global level
- Design and implement new statistical methodologies, processes and/or solutions to strengthen current research practices
- Assist with delivery of financial targets for PMR
- Meet KPIs tied to performance to contribute to overall financial and department success

Essential Requirements:

- 7+ years previous work in market research / specialist agencies
- Significant experience of managing multi-methodology market research projects encompassing multi-markets
- Experience in working across regions and within a commercial, primary market research team and the ability to work with a cross-functional team in a matrix environment.
- Project management - scoping, defining deliverables, business case development and reporting at a senior level including the ability to communicate effectively and to have a persuasive and credible presentation style
- Strong business acumen and solution-orientation mindset including budget and P&L

management

- Experience in remote relationships (on-shore/off-shore capability delivery).
- Preferred: Knowledge of the disease areas within the Pharma sector, with strong leadership and communication skills
- University degree BA/BS/MA degree in business, statistics/mathematics, medicine, sciences, health economics, sociology, psychology.
