Job ID
REQ-10062736

3   25, 2026

India

The Director, Provider Master Data Management will be responsible for overseeing the management and maintenance of provider master data within the organization. This role involves ensuring the accuracy, consistency, and integrity of provider data across various systems and platforms. The Lead will collaborate with cross-functional teams to develop and implement data management strategies, policies, and procedures.

About the Role

Key Responsibilities:

- Lead the provider master data management team and oversee daily operations.
- Includes Product Ownership, accountability for operations, roadmap development and ensuring needs of all IDS sleeves from provider mastering are met
- Develop and implement data management strategies, policies, and procedures.

- Ensure the accuracy, consistency, and integrity of provider data across various systems.
- Collaborate with cross-functional teams to identify and address data-related issues.
- Monitor data quality and implement measures to improve data accuracy.
- Manage data integration processes and ensure seamless data flow between systems.
- Provide training and support to team members on data management best practices.
- Generate reports and insights from provider data to support decision-making.
- Stay updated with industry trends and best practices in provider data management

Essential Requirements:

- 15 years of experience in the pharmaceutical or healthcare industry, with a strong focus on provider data management in a healthcare setting.
- Knowledge of data governance and compliance standards.

- 10+ years of people management experience. Proven track record of enabling data-driven decision-making at a senior leadership level, including addressing complex business challenges.

- Novartis seeks an individual with extensive experience in the pharmaceutical or healthcare industry, with a deep understanding of data management, provider data, master data management tools, product life cycle. The candidate should foster a collaborative and innovative work environment.
- Bachelor's degree in information management, Data Science, or a related field.
- Proven experience in master data management, preferably in the healthcare industry.
- Strong leadership and team management skills.
- Excellent analytical and problem-solving abilities.
- Proficiency in data management tools and software.
- Strong communication and collaboration skills.
- Attention to detail and commitment to data accuracy.

Desired Requirement:

- Strong analytical background, strategic thinking and problem-solving skills, with the ability to translate complex data into actionable insights and aligning them with business priorities to drive impactful results
