摘要

The purpose of the Associate Director, Delivery Lead role is to lead the end-to-end delivery of manufacturing relevant applications within a program called SpotOn which requires working closely with development teams, as well as advocating existing solutions and creating roadmaps for the solutions in the portfolio.

You will be ensuring development runs smoothly, driving continuous process improvements, cooperating with various teams along the solution delivery value chain. Supporting project and solution delivery managers with content for meetings and team events. You will interact with all relevant stakeholders to ensure successful solution delivery to agreed design standards. The typical stakeholders are: site leadership teams, program managers, developers, DevOps, Security, Infrastructure teams, Platform support teams, Quality assurance team members as well as other Product Owners.

Your responsibilities include, but are not limited to:

- Understand the requirements of manufacturing sites and be able to present existing solutions, as well as identifying new use cases for potential new developments.
- Design and manage the development of modular, reusable, elegantly designed and maintainable software that supports the organization as well as strategic initiatives.
- Prepare roadmap for the products that you are responsible of and be lookout on the potential new users from different manufacturing sites.
- Present ongoing activities to higher management to get buy-in from the management for potential scope changes.
- Collaborate extensively with your colleagues across Security, Compliance, Engineering, Product Management, and Business Management.

Key Performance Indicators:

- Committed roadmaps are followed and designs are signed off by Domain and Data architects as well as business.
- On time delivery of committed applications and enhancements that are able to achieve benefits planned.
- Demand planning is executed in time and successful kick-off and ramp-down of projects after implementation.
- Ensure cooperation and support for external and internal developers.
- Launch of innovative technology solutions across Novartis at scale.
- Operations stability and effective risk management.
- Feedback on customer experience.

Minimum Requirements:

- 10+ years of prior IT experience in a professional environment, preferably worked with OT systems and understanding of data analytics products/capabilities
- Strong knowledge of automation systems and IT infrastructure
- Experience in customer facing IT roles and excellent communication and interpersonal skills
- Familiarity with GMP regulations and compliance standards
- Preferred experience with Data & Analytics solutions.
- Proficient in Agile, Disciplined Agile as well as Waterfall delivery concepts.
- Collecting and interpreting requirements as well as building supporting schemas to clarify requirements.
- Working experience with automation systems and leading development activities
- Proficient in using: Jira, Confluence.
- Familiar with: AWS services and query languages such as Spark, Python, SQL, Snowflake etc.
- Digital savvy: good grasp of the impacts and opportunities that data and technology will create for Operations
- Resourceful: able to find out what is available, what are the capabilities in order to position solutions for the requirements.
- Self-motivated: willingness to learn and upskill
- Be-bold: not afraid to come up with new ideas or offer alternative solutions

We offer permanent employment with 6 months of probation period. Submit your application with the CV in Slovenian and English language.
