

Associate Clinical Development Director (Neuroscience)

Job ID
REQ-10063936

10月 03, 2025

United Kingdom

摘要

LOCATION: London, United Kingdom or Dublin, Ireland or Basel, Switzerland

ROLE TYPE: Hybrid Working, #LI-Hybrid

Step into a role where your clinical expertise can shape the future of neuroscience. As Associate Clinical Development Director, you ' ll be at the forefront of global clinical trials, driving innovation and scientific excellence across complex neurological conditions.

Your insights will directly influence trial strategy, regulatory documentation, and patient safety, making a meaningful impact on lives worldwide.

Join a team that values curiosity, collaboration, and bold thinking where your contributions truly matter.

This is your opportunity to help reimagine medicine and make a lasting difference.

About the Role

Key Responsibilities

- Contribute to clinical development strategy and author trial-related documents aligned with the Clinical Development Plan
- Provide scientific input into regulatory documents including Investigator 's Brochures and submission dossiers
- Oversee clinical trial execution, ensuring scientific integrity and patient safety in collaboration with cross-functional teams
- Conduct ongoing review and interpretation of trial data with internal experts and safety boards
- Support final analyses, reporting, and publication of clinical trial results
- Lead clinical trials as Clinical Scientific Lead, guiding all clinical aspects in partnership with medical monitors
- Participate in global initiatives to enhance clinical development processes and standards

Essential Requirements

- Advanced degree in life sciences or healthcare; PharmD or PhD strongly preferred
- Minimum 3 years of clinical research or drug development experience across Phases I-IV
- At least 2 years of hands-on experience conducting global clinical trials in a matrixed environment
- Proven knowledge in neuroscience or related areas such as neurodegenerative or rare neurological diseases
- Strong understanding of clinical trial design, methodology, statistics, and regulatory processes
- Fluent in written and spoken English with excellent communication skills
- Demonstrated ability to collaborate effectively with cross-functional stakeholders
- Skilled in negotiation, conflict resolution, and building strong interpersonal relationships

Desirable Requirements

- Experience in neuroscience-related therapeutic areas such as neuroinflammation, neuromuscular, or rare neurological diseases
- Familiarity with Cell & Gene therapies or advanced clinical trial methodologies

Why Novartis?

We believe new insights, perspectives, and ground-breaking solutions can be found at the intersection of medical science and digital innovation.
