

# Senior Analyst

Job ID REQ-10064238

10月 14, 2025

India

## 摘要

- -Provide analytics support to IMO team on various low-medium complexity analytical reports.
- -Support and facilitate data enabled decision making for Novartis internal customers by providing and communicating qualitative and quantitative analytics.

### About the Role

Key Responsibilities:

Data Pipeline Development:

Design, implement, and maintain efficient ETL/ELT pipelines to process large-scale data.

Automate data workflows and optimize pipelines using Python and Dataiku.

Data Integration and Collaboration:

Work closely with data analysts, scientists, and business stakeholders to understand requirements and ensure the delivery of accurate and timely data solutions.

Ensure seamless integration of third-party data sources and APIs into the data ecosystem.

#### Performance Optimization:

Optimize infrastructure, pipeline performance, and resource utilization for cost efficiency and scalability.

Develop robust monitoring and error-handling solutions to ensure data pipeline reliability.

#### Governance and Security:

Implement data quality frameworks, governance policies, and security best practices.

Ensure compliance with organizational and regulatory data standards.

#### Continuous Improvement:

Keep up with industry trends, explore emerging technologies, and recommend tools/processes to enhance the data engineering function.

Participate in code reviews, share best practices, and mentor junior team members when needed.

#### Required Skills & Qualifications:

Experience: 3-7 years of professional experience in data engineering or related fields.

Programming: Strong proficiency in Python with experience in writing clean and efficient code for data manipulations and pipelines.

Data Platforms: Hands-on expertise in Dataiku for building workflows and automating tasks.

Big Data Frameworks: Experience with Databricks to process and analyze large-scale datasets.

Cloud Data Warehousing: Proficiency in Snowflake database design, query optimization, and data warehouse management.

ETL/ELT: Expert knowledge of building ETL pipelines and designing scalable solutions.

SQL: Advanced SQL skills for querying, transforming, and optimizing relational databases.

Problem-Solving: Strong analytical and troubleshooting abilities, with experience solving complex data challenges.

Communication: Excellent written and verbal communication skills to interact with varied stakeholders effectively.

#### Nice-to-Have Skills:

Familiarity with other cloud platforms such as AWS, Azure, or Google Cloud Platform.

Experience working with distributed systems and big data technologies like Spark is a plus.

Exposure to machine learning use cases and familiarity with deployment pipelines.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you.
