

# Medical Scientific Liaison (Immunology)

Job ID REQ-10064618

12月 02, 2025

Taiwan

## 摘要

#LI-Hybrid

As an Immunology Medical Science Liaison at Novartis, you'll be out in the field—developing peer-topeer relationships with medical experts and key stakeholders and members of the scientific community, utilizing scientific and medical evidence-based non-promotional materials.

From as early as two years before a new molecule launches, you will strategically prepare and support the development, launch and commercialization of Novartis products through scientific exchange, seeking external insight to shape Novartis understanding of the therapeutic environment. You will respond to unsolicited requests for scientific information and provide clinical trial support.

In this role you will report to Field Medical Excellence and work cross-functionally with Medical Affairs, Clinical, Market Access, and more—translating insights into actions that accelerate access to transformative oncology therapies.

#### About the Role

Major accountabilities:

### Medical Experts Management & Medical Support

- Develop peer to peer scientific relationships, assess advocacy (degree of Medical Expert
  understanding and agreement with medical platform statements) and contributions (activities
  in which Medical Experts are independently qualified to engage or collaborate with the
  organization), and respond to unsolicited requests for scientific information using approved,
  non-promotional materials with Medical Experts/Key Stakeholders, Health Care Professionals
  (HCPs) and decision makers.
- Contribute to identification and mapping of Medical Experts/key stakeholders in line with local strategies. Fulfil the Field Medical Excellence metrics expectation in daily practice and document accordingly in system. Evaluate and build the advocacy (degree of Medical Expert understanding and agreement with medical platform statements)
- Provide and discuss scientific information and data with HCPs to ensure quality and accuracy
  of medical and scientific information on new treatment options including Novartis products
  and selected areas of therapeutic interest.
- Liaise and provide up-to-date medical support to relevant external groups to ensure evidence based understanding of Novartis products relative to medical guidelines, and health economic information.

## Scientific Research Support

- Provide scientific educational activities to support study accrual for key trials as appropriate. Provide feasibility and research site recommendation for Novartis sponsored clinical trials.
- Collaborate with SSO team and Medical Advisors, to support clinical sites, including providing guidance in accordance with guidelines, Novartis Internal Policies, and regulations as appropriate.

#### Scientific Exchange/Insights

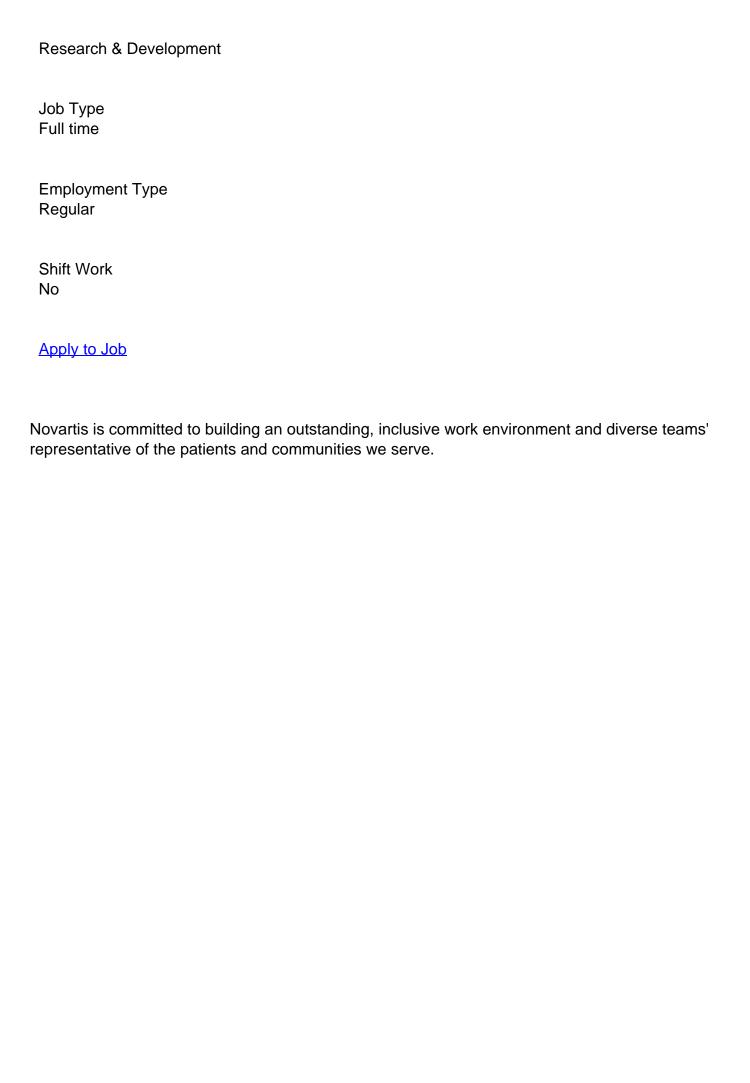

- Support scientific exchange to advance understanding of new scientific principles, novel research trends, and current scientific debate. Provide scientific and educational information to healthcare professionals on specific patient critical issues.
- Collect, analyse and report insights that may impact Novartis development plans /trial designs, launch strategies and tactics and medical education programs tailored to physicians' education needs. Exchange insight monthly with medical team to support strategy.

#### Scientific Projects

Implement scientific projects according to global, regional or local medical strategies.
 Examples may include, but not limited to, epidemiology projects, registries, preclinical or translational research, as well as multi-disciplinary projects involving education and collaboration of multiple functions in the medical community to improve patient diagnosis and
