摘要

About the role:

#LI-Onsite

The Associate Director, Global Program Management, Oncology, will provide project management expertise as an individual contributor to drug discovery and early-stage drug development programs. The key to success will include working across a global team, building impactful cross-functional teams, working collaboratively with stakeholders, project leaders, and project team members, and driving the creation and execution of integrated strategic and operational plans for drug candidates in the Oncology portfolio.

About the Role

Key Responsibilities:

- Lead project teams with respect to the timing, scenario/options development, risk management, opportunities / challenges, and requirements of interfacing with Decision Boards.
- Partner with project team leaders and functional leaders to define project strategy in alignment with Disease Area goals, develop and maintain integrated project plans, and manage diverse teams across multiple sites to meet project timelines/goals.
- Continuously adapt project strategy based on internal and external information. Assure continuous consistency of the operational plan with project strategy to ensure Biomedical Research portfolio decisions aligned to Novartis strategy.
- Use drug discovery and development expertise (especially preclinical and early clinical development) to integrate knowledge of all line functions for project.
- Ensure that key milestones and go / no go criteria are data-driven and clearly defined.
- Own quality of project information and make sure project information is accurate and included in the system(s) in a timely matter.
- Manage and communicate project status, issues and options for resolution to ensure optimal and timely information flow to all stakeholders. Responsible along with ONC Global Program Management Leadership Team for ensuring realistic forecasts and timely flagging of forecast variations with rationale; advancement of assigned program toward key decisions; risk mitigation and scenario planning.
- Foster effective, proactive and open communication within and across project teams, build mutual respect and trust among team members to achieve transparency and clarity of program goals, progress and issues.
- Contribute to the functional excellence of program management through improvement in processes, procedures, and tools related to program management practices.
- Mentoring other program managers within and across Biomedical Research to strengthen internal talent, sharing program management takeaways across other Disease Areas, and contribute to Biomedical Research Global Program Management initiatives

Essential Requirements:

- This position will be located at the Cambridge, MA and will not have the ability to be located remotely. This position will require up to 4% travel as defined by the business (domestic and / or international).
- Master 's or doctorate in life sciences OR MBA with either a bachelor 's degree or equivalent experience in life science.
- 6.5+ years of pharmaceutical industry experience.
- Previous track record of success working with and managing international and multidisciplinary drug discovery teams.

Desirable Requirements:

- PMP certification (or similar).

The salary for this position is expected to range between \$138,600 and \$257,400 per year.

The final salary offered is determined based on factors like, but not limited to, relevant skills and experience, and upon joining Novartis will be reviewed periodically. Novartis may change the published salary range based on company and market factors.

Your compensation will include a performance-based cash incentive and, depending on the level of the role, eligibility to be considered for annual equity awards.

US-based eligible employees will receive a comprehensive benefits package that includes health, life and disability benefits, a 401(k) with company contribution and match, and a variety of other benefits. In addition, employees are eligible for a generous time off package including vacation, personal days, holidays and other leaves.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you.
