Switzerland

摘要

Location: Basel, Switzerland #onsite

Role Purpose:

The position is within the Global Technical R&D department of Global Drug Development. Within this organization Chemical & Analytical Development (CHAD) plays an essential role in the development of processes for manufacturing and analysis of Antibody-oligonucleotide conjugates (AOCs).

About the Role

Your Responsibilities:

- With your strong expertise and creativity in analytical development, you take a leading role in setting up future analytical control strategies and standards for AOC projects and support knowledge transfer for in-licensed molecules.

- In our labs, your experimental designs will be executed and allow you to interpret and report data and results
- Further, he/she coordinates and plans all cGMP related activities for starting materials and intermediates to ensure timely manufacture under GMP within Chemical & Analytical Development.
- As a core member of crossfunctional team, you collaborate closely with our internal and external partners to ensure timely and quality delivery of new nucleotide drugs to our patients
- Further, he/she provides relevant process documentation in support of filing of dossiers
- He/she is also actively participates in scientific exchange groups within Novartis and Academia as well as maintains excellent collaborations with our customers.

What you ' ll bring to the team:

- Scientific curiosity coupled with recognized achievements in the development of new analytical methods using advanced separation and detection technologies (e.g. UHPLC, SEC, IX, IP, SFC, 2D-LC, CAD, and related hyphenated techniques including high resolution MS)
- Dedicated, thoughtful and flexible team working skills.
- Good knowledge of English (oral and written) is required, good command of German (spoken/ written) is desirable.
- Excellent knowledge of laboratory and/or technical tools
- Good knowledge of software and computer tools such as Office package

Desirable Requirements:

- We are looking for candidates with PhD and PostDoc in analytical chemistry with specialization in the field of bioconjugation analytics.
- Proven track record and relevant professional experience (minimum 2-3 years) in field of analytical development for bioconjugation is required.
