Switzerland

摘要

Location: Basel, Switzerland #onsite

Role Purpose:

The position is within the Global Technical R&D department of Global Drug Development. Within this organization Chemical & Analytical Development (CHAD) plays an essential role in the development of processes for manufacturing and analysis of Antibody-Oligonucleotide conjugates (AOCs).

About the Role

Your Responsibilities:

- With your strong expertise and creativity in synthesis and process development, you take a leading role in setting up future chemistry and manufacturing pathway for Antibody-Oligonucleotide-Conjugates (AOCs).

- You will be a key contributor to engage and ensure adequate support and knowledge transfer for Novartis BD&L activities focussing on chemistry and manufacturing processes.
- In our labs, your experimental designs will be executed and allow you to interpret and report data and results
- Further, he/she coordinates and ensures timely availability and transfer of manufacturing instructions to pilot plant within Chemical & Analytical Development or CMOs.
- As a core member of crossfunctional team, you collaborate closely with our internal and external partners to ensure timely and quality delivery of new nucleotide drugs to our patients
- Further, he/she provides relevant process documentation in support of filing of dossiers.
- He/she is also actively participates in scientific exchange groups within Novartis and Academia as well as maintains excellent collaborations with our customers.

What you 'll bring to the team:

- Expert knowledge in the field of bioconjugation, preferably conjugation of oligonucleotides to antibodies. Other bioconjugation expertise is also a benefit.
- Dedicated, thoughtful and flexible team working skills.
- Good knowledge of English (oral and written) is required, good command of German (spoken/written) is desirable.
- Excellent knowledge of laboratory and/or technical tools
- Good knowledge of software and computer tools such as Office package

Desirable Requirements:

- We are looking for candidates with PhD and PostDoc in organic chemistry, biochemistry or biological chemistry with specialization in the field of bioconjugation.
- Proven track record and professional experience (minimum 2-3 years) in field of bioconjugation is required.
