Associate Scientist Technical Development - Legge 68/99 (tempo determinato)

Job ID
REQ-10068311

1   13, 2026

Italy

Plan, perform and report scientific experiments with SME (subject matter expert) to support the innovation projects and/or advance the innovation technical platform of radiopharmaceutical parenteral dosage forms. Contribute to maintenance of laboratory instruments/infrastructure.

About the Role

Key responsibilities

- Plan and execute characterization studies, analytical tests, and method development with the innovation project leader (e.g., HPLC purity, UV content, identity, pH, osmolality, visible particles).

- Perform literature searches, support innovation, contribute to RLT IP and platforms, and share learnings across local/global teams.
- Provide raw data documentation, contribute to result interpretation, and ensure all documentation is correct, structured, complete, and compliant with SOPs, HSE, and AdAcAp/Novartis guidelines.
- Maintain clean and tidy work areas, including proper waste management, and keep accurate records of chemicals, intermediates, excipients, and solvents.
- Ensure correct and timely completion of logbooks and eLN experiments according to local procedures.
- Strictly follow HSE rules, laboratory workflows, and procedures related to shipments and materials management.
- Keep all required training up to date with no overdue assignments without acceptable cause.
- Act as an ambassador for the Novartis mindset, fostering a collaborative, curious, and courageous working style and applying continuous improvement principles.

Essential requirements:

- Master's degree in a scientific field and 1–3 years of relevant pharmaceutical/biotech industry experience
- Good English skills (oral and written) and fluent in the local site language
- Awareness of safe handling of chemicals, hazardous materials, and laboratory/technical equipment
- Adequate scientific or technical knowledge in a specific area (e.g., synthetic, analytical, pharmaceutical)
- Good knowledge of pharmaceutical quality control and production processes
- Adequate knowledge in related scientific/technical collaboration areas
- Good knowledge of laboratory and/or technical tools, including relevant software and computer tools
- Basic presentation and scientific/technical writing skills
