摘要

Novartis ambition is to be a recognized leader in Data, Analytics, AI & Platforms (DAP). The DAP group seeks a highly motivated Data Platforms Director to lead the data platforms strategy, including cloud infrastructures, MDM and other tech stack for Novartis International. This role is to govern centralized, multi-tenant data hub for countries to collaborate, share & co-create data assets for industrialization of analytics & AI.

This role works in partnership with AI & Data Science, Analytics and Marketing Platforms teams, other Commercial Launch Strategy (CLS) teams, International/Regions/Countries (IRC), Strategy & Growth (S&G), IT, Finance and others to manage Data platform solutions across the commercial value chain of Novartis International. The person will keep abreast of the latest thinking and best-in-class practices for Data platforms, processes, data management, data quality & compliance within the industry.

This leader will build a strong partnership and collaboration with DDIT to ensure the end-to-end data management capabilities are deployed at scale.

Location: Barcelona, Spain

About the Role

Key Responsibilities:

- Responsible for leading a centralized multi-tenant data-hub to host commercial, patient services, market access, digital, next generation data and services across Novartis International.
- This role leads data technology capabilities by partnering with diverse stakeholders of International eco-system, driving alignments.
- Accountable to implement data platforms that adhere to the Novartis enterprise data management (EDM) for International, providing strategic direction and oversight for the design, development, operation, and support of EDM capabilities that fulfil the needs of the organization, diverse use cases & personas.
- Build capabilities to deliver efficiency, trust & agility to communities of data consumers by focusing on strong, automated & centralized data platforms, data-quality, data-classification, lineage, catalogue & standardize data journey framework.
- Proactively lead efforts across International Data strategy to ensure that our next-generation capabilities evolve to support future Novartis International's objectives.
- Shapes and executes data strategies; Identifies, assesses, and optimizes opportunities to align with executive leadership to achieve our outcome-driven goal of spending optimization.
- Ensure that Novartis International is maximizing its investment in Data by leading as the internal expert and proactively educates stakeholders on the value, availability, and proper use of data while automating, cost optimizing and harmonizing for redundancy.
- Work closely with country data and analytics teams to carefully customize the Data solutions for local needs while preserving standardization for implementing Data at scale and speed.
- Collaborates with internal, external stakeholders including ethical, legal, and compliance team to apply governance, risk minimization and appropriate use based on data for fully compliant data procurement, data protection & consumption while maximizing automation and integration with the data and analytics ecosystem.
- Drive data operations at scale to ensure that International organization has the solid, reliable, compliant and competitive data backbone for Novartis International.
- Accountable and responsible to plan and manage budget, resources, timelines of the Data solutions lifecycles and change management.

Essential Requirements:

- Bachelor's degree in Computer Science, Engineering, Mathematics, Statistics, Analytics, Business, or another technical degree. Master's degree preferred.
- 8+ years of experience in cloud infrastructure, data, analytics, IT, or a similar role.
- 5+ years of Pharmaceutical/Biotech/Healthcare and Consumer experience in analytics.
- Experience and understanding of digital & healthcare datasets, including structured and unstructured data sets, but not limited to customer journeys, patient-level claims (closed and open), prescription data, sales & distribution data, and content & channel data.
- Experience with Agile ways of working.

Desirable requirements:

- Hands-on and leadership experience in data engineering/cloud environment.
- Experience with Cloud Computing and big data architectures and engineering.
- Ability to independently conduct various analytics on pharma commercial data.
- Experience in building Data solutions embedded in marketing platforms such as, CRM, SFMC, Web ecosystems, social media, etc.
- Recognized externally as a Data leader via publications, external presentations, etc.

Benefits and Rewards:

Company Pension Plan, Life and Accidental Insurance, Meals Allowance or Canteen in the office, Flexible working hours. Read our handbook to learn about all the ways we 'll help you thrive personally and professionally: [Novartis Life Handbook](#)
