

## Research Scientist II

Job ID  
REQ-10072255

3月 17, 2026

Switzerland

### 摘要

Type : Temporary position

Duration : A minimum of 6 months

### About the Role

Type : Temporary position

Duration : A minimum of 6 months

Requires an understanding of one or more of the following: molecular biology and cell biology.

Research Scientist II: Performs experiments and procedures demonstrating proficiency with a broad range of scientific or technology techniques; executes high quality experiments and delivers and interprets data with colleagues and/or project teams. -

Major accountabilities:

- Research Scientist II: Generates hypotheses to test, troubleshoots issues and designs and executes the next set of experiments with some input from senior lab members/manager.
- Generate stable research cell lines expressing membrane proteins, including freezing, thawing, cultivation, transfection and selection of mammalian cell lines.
- Confirm expression by FACS analysis and perform FACS sorting if needed
- Transient small scale expression tests including Western Blot readouts
- Understanding of molecular biology and plasmid design is a plus
- Collecting, analysing and processing of data, result interpretation, preparation of summary documents and reports
- Document experiments and data using electronic lab book and data management systems
- Participates constructively and presents own data in working teams and at lab meetings
- Works collaboratively across lab with all members.
- Steps in to support general lab responsibilities i.e. active participation in lab organization including maintenance of equipment

Key performance indicators:

Minimum Requirements:

Work Experience:

- At least 1 year of relevant work experience in industry with MSc University degree in a relevant life science discipline, or at least 3 years of relevant work experience in industry with either completed Apprenticeship or BSc University degree in a relevant life science discipline
- Good theoretical and strong practical laboratory experience in mammalian cell culture (transfection, stable cell line generation, FACS analysis)
- High learning ability to acquire expertise in new technologies
- Proven experience in successfully prioritizing and keeping timelines
- Excellent organization skills; ability to run multiple projects in parallel
- Independent and accurate working style, results-driven and committed to quality
- Open and proactive communication, strong customer focus, ability to interact with various stakeholders
- Reliable and flexible team player, used to share tasks and projects

Skills:

- Collaboration.
- Communication Skills.
- Data Analysis.
- Laboratory.
- Mammalian Cell Culture.
- Molecular Biology.

Languages :

- Fluency in English (oral/written); German advantageous.

Novartis is committed to working with and providing reasonable accommodation to all individuals. If, because of a medical condition or disability, you need a reasonable accommodation for any part of the recruitment process, or in order to receive more detailed information about the essential functions of a position, please send an e-mail to [inclusion.switzerland@novartis.com](mailto:inclusion.switzerland@novartis.com) and let us know the nature of your request and your contact information. Please include the job requisition number in your message.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally. [Read our handbook \(PDF 30 MB\)](#)
