摘要

Imagine shaping the future of Radioligand Therapies while working at the centre of global scientific, clinical, and strategic decision-making. This is a global leadership role accountable for defining and delivering the medical strategy for Novartis' Radioligand Therapy (RLT) portfolio across early development, launch, and in-market phases.

You will:

- Shape medical strategy across high-priority oncology assets
- Influence early asset decisions, evidence generation, and global launch readiness
- Lead cross-functional alignment across Development, Regulatory, and Commercial
- Represent the global medical voice in senior governance and portfolio discussions

This role operates at the centre of strategic decision-making, with direct impact on how RLT therapies reach patients worldwide.

Locations: London, UK / Basel, Switzerland #LI-Hybrid

Novartis is unable to offer relocation support for this role: please only apply if this location is

accessible for you.

About the Role

Responsibilities:

- Lead the global medical affairs strategy for Radioligand Therapies (RLT) across early development, launch and in market phases, ensuring alignment across the full portfolio lifecycle.
- Shape integrated evidence and lifecycle strategies using innovative methodologies, including interventional, non interventional and real world evidence studies, to inform portfolio prioritisation and investment decisions.
- Provide strategic medical leadership to guide lifecycle planning and influence portfolio and governance decisions across global functions and senior cross functional forums.
- Partner closely with Development, Regulatory, Commercial and regional Medical Affairs teams to ensure patient, clinical, regulatory and access needs shape study design and execution.
- Drive the creation and delivery of robust global medical launch plans, including field medical readiness, education and scientific communication strategies across priority markets.
- Represent the global medical perspective with credibility in senior stakeholder interactions, cross functional governance forums and high impact external engagements.
- Champion the voice of patients by embedding unmet needs, real world insights and patient perspectives into global evidence generation and medical strategies.
- Ensure all medical activities meet the highest standards of quality, ethics, compliance and scientific integrity across a complex, matrixed global organisation.
- Build, strengthen and lead global medical expert networks, including key opinion leaders, investigators and academic partners, to elevate scientific exchange and external engagement.
- Track, optimise and report on medical plan performance, ensuring timely, cost effective execution and efficient use of resources across global programmes.

Essential for the role:

- Advanced degree in a health related field (Doctor of Medicine strongly preferred; Doctor of Philosophy or Doctor of Pharmacy also considered).
- Significant pharmaceutical industry experience within global medical affairs and/or clinical development, gained in a complex, matrixed organisation, with demonstrated impact at global level.
- Proven experience in oncology and/or Radioligand Therapies, including contribution to early asset strategy, pre launch planning, global launch execution, and lifecycle management.
- Strong strategic mindset with a proven track record of influencing senior stakeholders and enabling cross functional decision making across global governance forums.
- Demonstrated experience shaping and delivering global medical strategy across multiple development phases, from early clinical assets through launch and post launch optimisation.
- Extensive experience delivering complex global evidence generation programmes to a high scientific and ethical standard, on time and within scope.

- Deep understanding of clinical research principles, regulatory frameworks, healthcare systems, and ethical standards, with a strong background in clinical research and collaboration with academic institutions and external partners.
- Established credibility as a peer expert with external medical leaders, investigators, and scientific communities, and a proven ability to collaborate effectively across global functions, regions, and therapeutic areas.

Commitment to Diversity & Inclusion:

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally. [Read our handbook \(PDF 30 MB\)](#)
