

QC Microbiology Technician (Wed-Sat 12:00pm - 10:30pm)

Job ID
REQ-10076095

4月 21, 2026

USA

摘要

Are you passionate about protecting product quality and patient safety through your work? As a QC Microbiology Technician, you will play a vital role in ensuring our manufacturing environments meet the highest microbiological standards. Working onsite in Morris Plains during a Wednesday through Saturday, 12:00 PM to 10:00 PM shift, you will support environmental monitoring activities, generate high quality data, and contribute directly to product release.

About the Role

#LI-Onsite

Shift/Hours: Wednesday - Saturday, 12:00pm - 10:30pm

Location: Morris Plains, United States

Relocation Support: This role is based in Morris Plains, United States. Novartis is unable to offer relocation support: please only apply if accessible.

Key Responsibilities:

- Perform routine and batch related environmental monitoring in controlled manufacturing environments.
- Document laboratory activities accurately and in real time, following current Good Manufacturing Practices.
- Record, review, and maintain laboratory data in accordance with data integrity principles.
- Support daily setup, operation, and maintenance of the environmental monitoring laboratory.
- Incubate, read, and enumerate microbiological samples using cultured media.
- Prepare microbiology samples and out of specification media for shipment to contract laboratories.
- Review and track microbiology results supporting timely product release.
- Collect samples and analyze data supporting gowning qualification programs.
- Ensure laboratory equipment is calibrated, maintained, and functioning properly.
- Identify and support continuous improvement initiatives.

Essential Requirements:

- Associate or bachelor ' s degree in microbiology or a closely related scientific field.
- At least one year of experience in a pharmaceutical or biopharmaceutical laboratory.
- Knowledge of current Good Manufacturing Practices and Good Laboratory Practices.
- Experience performing environmental monitoring or microbiology testing.
- Ability to document laboratory activities accurately while maintaining data integrity.
- Understanding of aseptic techniques and microbiological principles.
- Ability to follow standard operating procedures and laboratory methods.
- Strong communication skills and ability to work independently and collaboratively.

Desirable Requirements:

- Experience using a Laboratory Information Management System.
- Familiarity with hazardous waste handling procedures in laboratory environments.

US Salary Transparency

The pay range for this position at commencement of employment is expected to be between \$45,300 and \$84,100 annually; however, while salary ranges are effective at the time of posting, fluctuations in the job market may necessitate adjustments to pay ranges. Final pay determinations will depend on multiple factors, including but not limited to geographic location, experience level, knowledge, skills, and abilities.

The total compensation package for this position may also include other elements, where applicable, including discretionary bonuses and a full range of medical, financial, and/or other benefits. Eligible employees may receive benefits such as health insurance, life and disability coverage, a 401(k) with

company contribution, and various paid time off benefits, including vacation, sick time, and parental leave. Details of participation in these benefit plans will be provided if an offer of employment is extended.

If hired, the employee will be employed in an at-will position, and the Company reserves the right to modify base salary or other compensation programs at any time based on business or market factors.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives.
