

Associate Director AI Platform Architect - AWS

Job ID
REQ-10077324

5月 11, 2026

India

摘要

Location: Hyderabad

The Associate Director, AI Platform Architect - AWS will play a strategic role in defining, architecting, and scaling enterprise-grade AI platforms on Amazon Web Services (AWS). This role requires deep expertise in AWS-native AI/ML and GenAI services, enterprise platform architecture, multi-agent systems, and cloud governance in regulated environments. The architect will work closely with Business Units, AI PMO, MLOps, Security, and Engineering teams to shape the future of scalable AI platform capabilities across Novartis.

About the Role

Major accountabilities:

AWS AI Platform Architecture

- Design, architect, and evolve enterprise-scale AI platform capabilities leveraging AWS Bedrock, Amazon SageMaker, AWS Bedrock AgentCore, and other AWS-native AI services.
- Build and maintain reusable AWS AI reference architectures, enterprise blueprints, and platform standards to accelerate scalable AI adoption across Novartis.
- Architect AI platform capabilities for Retrieval-Augmented Generation (RAG), Graph AI, multi-agent orchestration, and enterprise knowledge systems. Design secure and scalable AI runtime environments integrating AWS services such as Lambda, ECS/EKS, Step Functions, API Gateway, DynamoDB, S3, and EventBridge.

GenAI & Multi-Agent Platform Engineering

- Lead architecture for Bedrock Agents, AgentCore runtime patterns, and multi-agent collaboration frameworks supporting enterprise AI use cases. Enable enterprise AI orchestration capabilities using LangChain, LangGraph, LlamaIndex, DSPy, and AWS-native orchestration services.
- Design enterprise AI platform capabilities for prompt management, model evaluation, guardrails, observability, and AI governance. Support AI platform integrations with enterprise systems, APIs, vector databases, and data platforms.

MLOps & Platform Operations

- Define scalable MLOps architecture leveraging SageMaker Pipelines, Model Registry, Feature Store, Model Monitor, and CI/CD automation frameworks.
- Collaborate with platform engineering teams to operationalize AI workloads with observability, resiliency, auditability, and cost optimization. Drive platform modernization initiatives enabling enterprise-scale deployment, monitoring, and lifecycle management of GenAI applications.

Governance, Security & Compliance

- Ensure all AI platform architectures align with Novartis security standards, GDPR, HIPAA, GxP validation requirements, and the EU AI Act.
- Define AWS security and networking standards for AI workloads including IAM, VPC, PrivateLink, KMS encryption, Secrets Manager, and CloudTrail.
- Embed responsible AI controls using Amazon Bedrock Guardrails, SageMaker Clarify, model evaluation frameworks, and enterprise governance tooling.
- Collaborate with Legal, Risk, and Regulatory stakeholders to ensure platforms meet current and anticipated regulatory frameworks across all geographies in which Novartis operates.

Technology Evaluation & Innovation

- Evaluate emerging AWS GenAI technologies, foundation models, and AI frameworks to support Novartis AI strategy and innovation roadmap.
- Lead proof-of-concept (PoC) initiatives validating scalability, security, performance, and operational readiness of new AI platform capabilities.
- Partner with AWS and strategic vendors to drive innovation and align with AWS Well-Architected Framework principles for AI workloads.
- Represent the AI Architecture function in innovation councils, governance reviews, and enterprise architecture forums.

Leadership & Collaboration

- Provide architectural leadership and mentorship to engineering and solution teams within the India hub and global organizations.
- Act as a trusted advisor to Business Units and AI Product Management teams, translating business requirements into scalable AI platform architectures.
- Collaborate with enterprise architects, cloud engineering, and data platform teams to ensure consistency and scalability across AI platforms.

Minimum Requirements:

- Bachelor ' s / Master ' s degree in Computer Science, AI/ML, Data Science, Cloud Computing, or equivalent.
- 14+ years of experience in enterprise IT/solution architecture including 5+ years in AI/ML and 3+ years in GenAI platform architecture.
- Deep hands-on expertise with AWS AI/ML services including Amazon Bedrock, SageMaker, Bedrock Agents, Lambda, ECS/EKS, Step Functions, API Gateway, and related AWS ecosystem services.
- Strong experience architecting enterprise AI platforms supporting RAG, Graph AI, multi-agent orchestration, and GenAI application delivery.
- Hands-on experience with MLOps platforms, CI/CD pipelines, infrastructure-as-code, and enterprise observability frameworks.
- Strong understanding of AI governance, security, compliance, and regulatory requirements including GDPR, HIPAA, GxP, and EU AI Act.
- AWS certifications strongly preferred: AWS Certified Solutions Architect - Professional and/or AWS Certified Machine Learning Specialty. Experience in pharma, healthcare, or life sciences industry highly preferred.
- Proficiency in Python and familiarity with orchestration frameworks such as LangChain, LangGraph, LlamaIndex, and DSPy.
- Excellent stakeholder management, communication, and executive presentation skills

Why Novartis?

Our purpose is to reimagine medicine to improve and extend people ' s lives and our vision is to become the most valued and trusted medicines company in the world. How can we achieve this? With our people. It is our associates that drive us each day to reach our ambitions. Be a part of this mission and join us!
