### 摘要

We are seeking a highly skilled and motivated Data Engineer to join our dynamic team. The ideal candidate will have hands-on experience in building data pipelines, transforming data, and optimizing platforms using Python, Dataiku, Databricks, and Snowflake. As a Data Engineer, you will play a key role in empowering data-driven decision-making across the organization.

### About the Role

Key Responsibilities:

Data Pipeline Development:

Design, implement, and maintain efficient ETL/ELT pipelines to process large-scale data. Automate data workflows and optimize pipelines using Python and Dataiku.

Data Integration and Collaboration:

Work closely with data analysts, scientists, and business stakeholders to understand requirements and ensure the delivery of accurate and timely data solutions.

Ensure seamless integration of third-party data sources and APIs into the data ecosystem.

#### Performance Optimization:

Optimize infrastructure, pipeline performance, and resource utilization for cost efficiency and scalability.

Develop robust monitoring and error-handling solutions to ensure data pipeline reliability.

#### Governance and Security:

Implement data quality frameworks, governance policies, and security best practices.

Ensure compliance with organizational and regulatory data standards.

#### Continuous Improvement:

Keep up with industry trends, explore emerging technologies, and recommend tools/processes to enhance the data engineering function.

Participate in code reviews, share best practices, and mentor junior team members when needed.

#### Required Skills & Qualifications:

**Programming:** Strong proficiency in Python with experience in writing clean and efficient code for data manipulations and pipelines.

**Data Platforms:** Hands-on expertise in Dataiku for building workflows and automating tasks.

**Big Data Frameworks:** Experience with Databricks to process and analyze large-scale datasets.

**Cloud Data Warehousing:** Proficiency in Snowflake database design, query optimization, and data warehouse management.

**ETL/ELT:** Expert knowledge of building ETL pipelines and designing scalable solutions.

**SQL:** Advanced SQL skills for querying, transforming, and optimizing relational databases.

**Problem-Solving:** Strong analytical and troubleshooting abilities, with experience solving complex data challenges.

**Communication:** Excellent written and verbal communication skills to interact with varied stakeholders effectively.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally.
