

Clinical Development Medical Director - Neuromuscular

Job ID
REQ-10081229

6月 16, 2026

Ireland

摘要

Role Type: Hybrid Working, #LI-Hybrid

Locations: London, United Kingdom; Barcelona, Spain; Dublin, Ireland

Relocation Support: This role is based in either London, Barcelona or Dublin and Novartis is unable to offer relocation support: please only apply if accessible.

As Clinical Development Medical Director you will lead the science that shapes the future of medicine. You will sit at the forefront of global drug development, driving clinical strategy and delivering high-impact programs that bring innovative therapies to patients worldwide.

Partnering with cross-functional leaders and external experts, you will translate scientific insight into clinical execution, influence regulatory strategy, and guide critical decisions across the development lifecycle.

This is a unique opportunity to combine medical expertise, leadership, and global impact within a highly collaborative and dynamic environment.

About the Role

Key Responsibilities

- Focused in Neuroscience, with Neuromuscular experience if strongly preferred, but we would be open to experience in neuro-degeneration, muscular disorders and neuroinflammation.
- Provide clinical leadership and strategic medical input across assigned global clinical development programs
- Lead development of clinical sections for regulatory submissions, briefing documents, and investigator materials
- Drive execution of clinical programs in partnership with trial leaders and cross-functional global teams
- Oversee trial data review, interpretation, and reporting including clinical study reports and publications
- Support benefit-risk assessment and safety monitoring in collaboration with patient safety teams
- Engage with external stakeholders including regulatory authorities, key opinion leaders, and advisory boards
- Contribute to clinical strategy, standards development, and global initiatives across the development function

Essential Requirements

- Medical degree required, with clinical training and medical specialization in either Neuromuscular or Neuroscience / Neurodegeneration and/or Movement disorders
- Expertise in Gene Therapy research especially CAR-T is highly desirable
- Several years of experience gained in clinical research or global drug development across early and late phases
- Proven experience leading or contributing to global clinical trials, including planning, execution, and reporting
- Strong knowledge of clinical trial methodology, regulatory requirements, and good clinical practice standards
- Demonstrated ability to analyse, interpret, and communicate complex scientific and clinical data
- Experience working effectively in global, cross-functional, and matrixed environments with diverse stakeholders
- Strong leadership, collaboration, and communication skills, with the ability to influence senior stakeholders

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we ' ll help you thrive personally and professionally.
