摘要

#LI-Hybrid

Location: Barcelona, Spain

Relocation Support: This role is based in Barcelona, Spain. Novartis is unable to offer relocation support: please only apply if accessible.

Imagine shaping the future of Finance through the power of Artificial Intelligence. As an AI Senior Expert at Novartis, you will build intelligent, enterprise-scale AI solutions that transform how financial decisions are made and how business insights are generated. Working at the forefront of Agentic AI, large language models, and advanced analytics, you will collaborate with global experts across Finance, Data Science, and Technology to create innovative solutions that automate complex processes, enhance decision-making, and deliver measurable business impact. If you are passionate about turning cutting-edge AI into real-world value, this is an exceptional opportunity to help redefine the future of digital finance.

About the Role

Key Responsibilities

- Design and deploy Agentic Artificial Intelligence solutions that transform finance planning, forecasting, and performance management.
- Build multi-agent systems that reason, retrieve information, execute tasks, and generate business recommendations.
- Develop Artificial Intelligence-powered analytics that convert complex data into actionable business insights.
- Integrate large language models into enterprise workflows while ensuring reliability, transparency, and governance.
- Design Retrieval-Augmented Generation architectures using structured and unstructured enterprise knowledge sources.
- Implement monitoring, evaluation, and testing frameworks to measure solution quality, accuracy, and business impact.
- Partner with cross-functional teams to deliver innovative Artificial Intelligence products that create measurable value.

Essential Requirements

- Bachelor's or Master's degree in Computer Science, Data Science, Artificial Intelligence, Machine Learning, or related field.
- Minimum five years of experience developing Artificial Intelligence, Machine Learning, or enterprise software solutions.
- Proven experience building and deploying Artificial Intelligence agents or multi-agent systems in production environments.
- Advanced programming skills in Python and Structured Query Language for data-driven solution development.
- Hands-on experience with large language models, Retrieval-Augmented Generation, and enterprise Artificial Intelligence frameworks.
- Strong knowledge of cloud platforms, Artificial Intelligence operations practices, and scalable deployment architectures.

Desirable Requirements

- Experience supporting Finance, forecasting, or business performance management use cases through Artificial Intelligence solutions.
- Knowledge of responsible Artificial Intelligence practices, model governance, and enterprise regulatory compliance frameworks.

Commitment to Diversity & Inclusion

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally. [Read our handbook \(PDF 30 MB\)](#)
