摘要

We are seeking a highly skilled Database Engineer (Level 4) with 10-12 years of experience in enterprise database technologies.

This role is intended for a seasoned Database Engineer with strong Oracle and AWS expertise who can drive platform engineering, automation, modernization, and cloud adoption initiatives. The position focuses on building future-ready database services through engineering excellence, automation-first thinking, DevOps practices, and continuous service improvement, rather than traditional production database support activities.

About the Role

Key Responsibilities:

- Serve as a Subject Matter Expert (SME) for Oracle and AWS database platforms, providing technical guidance and engineering expertise.
- Design, implement, and continuously improve enterprise database platform standards, automation frameworks, and engineering best practices.
- Evaluate new database technologies, versions, features, and cloud services; provide recommendations for adoption and implementation.
- Lead technical execution of database lifecycle initiatives including upgrades, migrations, modernization, and cloud transformation activities.
- Develop and maintain automation solutions using scripting, Infrastructure-as-Code (IaC), and CI/CD practices to improve operational efficiency and service reliability.
- Engineer and optimize AWS database services including Oracle and PostgreSQL platforms.
- Collaborate with application, cloud, infrastructure, security, and architecture teams to deliver scalable and secure database solutions.
- Identify and implement opportunities to reduce manual effort, technical debt, operational risks, and service complexity through automation and standardization.
- Contribute to platform roadmaps, engineering standards, technical documentation, and knowledge sharing.
- Ensure compliance with security, regulatory, audit, and operational standards.

Essential Requirement:

- 10-12 years of overall database engineering and administration experience.
- Minimum 7+ years of Oracle Database engineering experience in enterprise environments.
- Minimum 3+ years of AWS cloud database experience.
- Hands-on experience with database upgrades, migrations, cloud transformation, and platform modernization initiatives.
- Experience designing and implementing automation solutions for database operations and engineering processes.
- Experience working within Agile and DevOps delivery models in large global organizations.

Commitment to Diversity & Inclusion

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Accessibility and accommodation

Novartis is committed to working with and providing reasonable accommodation to individuals with disabilities. If, because of a medical condition or disability, you need a reasonable accommodation for any part of the recruitment process, or in order to perform the essential functions of a position, please send an e-mail to diversityandincl.india@novartis.com and let us know the nature of your request and your contact information. Please include the job requisition number in your message.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally. [Read our handbook \(PDF 30 MB\)](#)
