摘要

The Senior Analyst is responsible for delivering data-driven insights and analytics that support global Radioligand Therapy (RLT) Technical Operations.

The role partners with manufacturing, supply chain, quality, and operational teams to transform complex business data into actionable dashboards, KPIs, and performance insights.

By leveraging advanced analytics tools and business process knowledge, the Senior Analyst enables informed decision-making, identifies process improvement opportunities, and drives operational excellence across the global RLT network.

About the Role

Major accountabilities:

- Develop and maintain analytics, dashboards, and KPI reporting to support global TechOps decision-making across Radioligand Therapy (RLT) operations.
- Source, transform, cleanse, and analyze data from multiple business systems to generate actionable business insights.
- Design and deliver Power BI visualizations that improve operational transparency and performance monitoring.
- Support manufacturing, supply chain, quality, and operational teams through data-driven analysis and reporting.
- Identify process gaps, data anomalies, and improvement opportunities through analysis of operational data.
- Translate business requirements into meaningful metrics, reports, and analytical solutions aligned with strategic objectives.
- Monitor operational performance indicators such as lead times, process adherence, on-time execution, and production performance.
- Act as a data enabler for cross-functional teams by providing reliable, standardized, and business-ready datasets.
- Contribute to process mapping, continuous improvement initiatives, and system enhancement projects.
- Collaborate with global stakeholders across RLT manufacturing sites to support operational excellence and performance improvement.

Essential requirements:

- Degree in Engineering, Computer Science, Statistics, Economics, Data Science, or a related field
- Strong experience in data analytics with advanced SQL and Python skills.
- Expert-level Power BI capabilities, including dashboard development and data visualization.
- Experience translating business requirements into actionable insights and performance metrics.
- Experience working with manufacturing, supply chain, quality, or operational datasets within a regulated environment.
- Previous experience within the pharmaceutical industry, with exposure to Radioligand Therapy, Oncology Technical Operations, or radioactive-product manufacturing environments.

Desirable requirements:

- Working knowledge of Snowflake and ERP systems (preferably SAP or Microsoft D365).

Commitment to Diversity and Inclusion

Novartis is committed to building an outstanding, inclusive work environment and diverse team representative of the patients and communities we serve.

Accessibility and Accommodation

Novartis is committed to working with and providing reasonable accommodation to individuals with disabilities. If, because of a medical condition or disability, you need a reasonable accommodation for any part of the recruitment process, or in order to perform the essential functions of a position, please send an e-mail to diversityandincl.india@novartis.com and let us know the nature of your request and your contact information. Please include the job requisition number in your message.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally. [Read our handbook \(PDF 30 MB\)](#)
