## About the Role

### Key Responsibilities

- Partner with regulatory teams to align Chemistry, Manufacturing and Control strategies across the product lifecycle.
- Evaluate product changes for regulatory impact and support compliant change control decisions.
- Serve as the primary site contact for regulatory matters and cross-functional stakeholder engagement.
- Provide regulatory guidance during quality events, investigations, escalations, and compliance discussions.
- Coordinate timely reviews of Chemistry, Manufacturing and Control documentation for assigned products.
- Support regulatory inspections and audits by identifying and addressing compliance risks.
- Drive initiatives that strengthen regulatory compliance and promote process harmonization.
- Deliver training and knowledge sharing to enhance regulatory awareness across site functions.

### Essential Requirements

- Advanced degree in Chemistry, Biology, Pharmacy, Engineering, or a related scientific discipline.
- More than three years of experience in a Good Practice regulated environment.
- Experience in Quality Assurance, Manufacturing, Development, or Regulatory Affairs within the pharmaceutical industry.
- Strong knowledge of biologic drug substance manufacturing processes involving recombinant proteins or nucleic acids.
- Ability to work independently, manage complex priorities, and make sound quality decisions.
- Fluent English communication skills with the ability to collaborate across global teams.
