摘要

Location: Barcelona, Spain
Function: Development, Patient Safety & Pharmacovigilance
Job Family: Digital, Data and IT Business Analysis
#LI-Hybrid

Job Description Summary

The Associate Director, DDIT Development, Patient Safety & Pharmacovigilance Business Analysis is accountable for translating complex Patient Safety and Pharmacovigilance (PS&PV) business needs into scalable, compliant and value-driven digital, data and technology solutions.

You will act as a strategic advisor to global PS&PV business leaders, Product Owners and technology teams, providing end-to-end business analysis leadership across business process design, requirements management, data analysis, solution definition, validation, testing, implementation and business adoption.

The role will help modernize PS&PV capabilities by simplifying business processes, improving data quality and traceability, enabling automation and applying digital, advanced analytics and artificial intelligence solutions where appropriate.

About the Role

Key Responsibilities

- Lead end-to-end business analysis for PS&PV reporting, data science and analytics initiatives, translating business needs into requirements, user stories, acceptance criteria and solution outcomes.
- Partner with PS&PV stakeholders to translate regulatory, compliance, operational and management reporting needs into scalable reporting and analytics capabilities.
- Define data and reporting requirements across safety data, dashboards, KPIs, regulatory reporting and decision-support solutions.
- Collaborate with Product Owners, Data Architects, Engineers, Data Scientists and Solution Architects to translate business outcomes into scalable technical solutions.
- Identify opportunities to simplify and standardize reporting, reduce manual processes and enable automation and self-service analytics.
- Shape appropriate AI and advanced analytics use cases, with consideration for human oversight, explainability, data quality and compliance.
- Maintain requirements traceability across solution design, testing and validation, supporting GxP and validated-system delivery.
- Influence senior stakeholders and facilitate decisions across global PS&PV, DDIT, Data, Quality, Security and vendor teams.

Essential Requirements

- University degree in Computer Science, Information Technology, Engineering, Life Sciences, Pharmacy, Business Administration or a related discipline.
- Significant experience in business analysis, product delivery, process transformation or digital technology within life sciences or another regulated industry.
- Experience defining and managing complex business, system, data and reporting requirements.
- Experience supporting regulated or validated systems, including requirements traceability, testing and User Acceptance Testing.
- Strong knowledge of business process modelling, requirements lifecycle management and Agile or product delivery practices.
- Experience working in global, cross-functional environments with business, technology, data, Quality and vendor stakeholders.
- Demonstrated ability to engage and influence senior stakeholders and drive alignment across organisational boundaries.
- Strong analytical, problem-solving, communication and presentation skills.

Desirable Requirements

- Knowledge of Patient Safety and Pharmacovigilance processes and technologies, including safety case management, aggregate reporting, signal management, risk management, PSMF or safety analytics.
- Experience with data, analytics, automation or AI solutions in regulated environments, alongside an understanding of GxP and validation principles.

Annual base salary: € 52,400 - € 97,400 EUR gross per year.
