摘要

Location: Ivrea, Italy #onsite

Role Purpose:
The TRD QC Senior Expert is a key technical and scientific role responsible for supporting the start-up and operation of the Pilot Plant QC laboratories. During the build-up phase, the role focuses on laboratory setup, instrument qualification, system implementation, SOP development, and validation activities to ensure GMP compliance and inspection readiness. Once operational, the position leads analytical activities related to technology transfer, method validation, and QC testing, while providing technical leadership, coordinating stakeholders, supporting investigations (OOS, deviations, CAPAs), and ensuring reliable, compliant, and timely analytical results. The role also contributes to continuous improvement, audit readiness, and the development of laboratory expertise.

About the Role

Main activities

- Support activities during the laboratory build-up phase for the start-up of the new Pilot Plant QC laboratories.
- Support and coordinate laboratory activities associated with technology transfer projects, including implementation of analytical methods, specifications, reference standards, and testing strategies.
- Act as the primary technical point of contact for cross-functional teams.
- Provide scientific and technical expertise for analytical methods, supporting method qualification, verification, troubleshooting, and lifecycle management.
- Evaluate analytical data, method performance, and technical risks, ensuring reliable, reproducible, and scientifically sound analytical results.
- Oversee routine Quality Control laboratory operations, ensuring effective planning, prioritization, and allocation of resources to meet business and project requirements.
- Support the management of deviations, OOX investigations, and CAPAs, performing technical assessments and contributing to root cause analysis and implementation of corrective and preventive actions.
- The role is responsible for the review and approval of analytical results supporting the release of finished products and the testing of raw materials
- Ensure compliance with cGMP, GLP, Data Integrity principles, pharmacopeial requirements, internal procedures, and regulatory expectations.
- Contribute to the qualification and lifecycle management of laboratory equipment, computerized systems, analytical standards, and reagents.
- Support audit and inspection readiness through accurate documentation, effective data review, and maintenance of a compliant laboratory environment.
- Provide technical coaching and mentoring to laboratory personnel.

Additional specific roles/tasks

- Act as point of contact for escalations from analysts and for cross-functional interfaces (QA, Manufacturing, TRD).
- Support change control activities impacting QC.
- Contribute to updates of SOPs/WIs and to the implementation of new tools or digitalization initiatives.
- Track and report relevant KPIs.
- Participate in internal audits, self-inspections, and regulatory inspection preparation activities

Ideal Background

Education (minimum/desirable):

Master ' s Degree in Pharmacy, Biology, Chemistry, or equivalent

Languages:

- Proficiency in Italian (Local Language)
- Fluency in spoken and written English

Experience/Professional requirement:

- Open and clear collaboration and communication
- Shows the appropriate sense of urgency around given tasks
- Scientific, technical and regulatory knowledge in the specific area.
- Strong knowledge of GMP regulations, analytical technologies, laboratory equipment qualification, and data integrity principles
- At least 5 years of experience in pharmaceutical companies in equivalent roles.
- Previous experience in radiopharmaceutical companies is preferred.
- Good organizational skills.
- Knowledge of computerized systems such as Chromeleon, GLIMS, and SAP.
- Good knowledge of analytical instrumentation, including HPLC, FT-IR, TLC, and UV spectroscopy.

Benefits & Rewards
