Ready to shape how Finance turns data into better, faster decisions? As Senior Data Product Manager, Digital Finance, you ' ll lead the vision, roadmap and delivery of enterprise Finance data products that people, analytics and artificial intelligence can trust and reuse. You ' ll take new data capabilities from strategy through development and delivery, working across Finance, Digital and data teams to translate complex priorities into scalable products. It ' s an opportunity to combine product leadership, Finance understanding and emerging technology to help shape the future of data-driven Finance at Novartis.

About the Role

Key Responsibilities

- Own the vision, roadmap and measurable outcomes for enterprise Finance data products.

- Translate Finance priorities into a transparent, value-driven product backlog.

- Lead product discovery, development, testing and delivery of scalable, trusted Finance data products and capabilities.

- Embed consistent Finance definitions, key performance indicators, business rules, lineage and governance into products.

- Partner across Finance, Digital, technology and data teams to align priorities, dependencies and decisions.

- Ensure products meet data governance, security, access-control and responsible artificial intelligence requirements.

- Drive adoption and continuous improvement through clear success measures, documentation, training and stakeholder feedback.

Essential Requirements

- Bachelor ' s or master ' s degree in a relevant discipline, or equivalent professional experience.

- Significant product management experience, including ownership of enterprise data products, platforms or analytics capabilities.

- Proven ability to define product vision, manage value-based roadmaps and deliver measurable outcomes.

- Strong understanding of enterprise Finance processes, controls, key performance indicators and end-to-end data flows.

- Strong business partnering, stakeholder management and communication skills, connecting Finance priorities with data and technology teams.

- Good knowledge of modern data platforms, including lakehouses, warehouses, data pipelines, contracts, lineage and observability.

- Working knowledge of structured query language and platforms such as Snowflake or Databricks, enabling effective partnership with technical teams.

- Understanding of data governance and responsible artificial intelligence, including data quality, security, guardrails, evaluation and human oversight.

Desirable Requirements

- Experience working in cross-functional teams across multiple organisational levels and business areas.

· Familiarity with enterprise data mana

gement and governance, including master data, data catalogues, security and semantic concepts.
