## 摘要

#LI-Hybrid

Location: Hyderabad, India

Relocation Support: This role is based in Hyderabad, India. Novartis is unable to offer relocation support: please only apply if accessible.

Your regulatory expertise can help ensure medicines reach patients around the world without interruption. As an ESO Regulatory CMC Facilitator, you will play a key role in shaping and coordinating regulatory Chemistry, Manufacturing and Controls activities across External Supply, supporting product changes, transfers and lifecycle activities.

Working closely with cross-functional and global partners, you will help translate evolving regulatory requirements into practical solutions, maintain strong compliance and enable the timely supply of medicines to markets worldwide. This is an opportunity to bring your expertise, collaborative mindset and regulatory perspective to a role where your contribution can make a meaningful difference for patients.

## About the Role

### Key Responsibilities

- Manage regulatory Chemistry, Manufacturing and Controls activities arising from product changes, transfers, divestments and remediation initiatives.
- Assess change requests and determine their regulatory impact as part of the External Supply change-control process.
- Coordinate complete, consistent source documentation for timely preparation of regulatory Chemistry, Manufacturing and Controls submissions.
- Facilitate high-quality regulatory documentation that supports efficient product registrations, lifecycle maintenance and ongoing compliance.
- Coordinate responses to health authority questions, ensuring accurate and timely regulatory information for External Supply products.
- Monitor regulatory commitments, required reports and supporting documentation to maintain compliance with applicable health authority requirements.
- Support product launches, transfers and changes by reviewing dossier compliance and relevant technical documentation.
- Build regulatory capabilities across External Supply by sharing regulatory intelligence, lessons learned and change-management expertise.

### Essential Requirements

- University degree in Pharmacy, Chemistry, Biology or another relevant scientific discipline.
- Professional experience in a regulatory Chemistry, Manufacturing and Controls environment.
- Experience within a manufacturing, quality assurance, laboratory or comparable technical environment.
- Working knowledge of regulatory requirements and submission processes supporting product registration and lifecycle management.
- Experience collaborating across interdisciplinary or matrix teams while coordinating activities across multiple projects.
- Fluent English, with strong written and verbal communication skills.
