摘要

Job Title: Manager, Corporate Affairs Intelligence - Emerging Issues

#LI-Hybrid

Location: East Hanover, United States

Relocation Support: This role is based in East Hanover, United States. Novartis is unable to offer relocation support: please only apply if accessible.

What is about to change in the world around Novartis, and what could it mean for us? In this role, you'll scan politics, economics, society, regulation, geopolitics, technology and new business models for early signals, and trace their second- and third-order effects. You'll give Corporate Affairs the foresight to prepare before issues take shape.

About the Role

Key Responsibilities

- Identify meaningful and non-obvious signals, patterns, contradictions, evidence gaps, connections, potential inflection points, and preliminary first-, second-, and third-order implications across political, economic, societal, regulatory, geopolitical, technological, and cross-industry developments.
- Connect external developments and potential inflection points to how the biopharmaceutical landscape may change and to the audiences, narratives, relationships, and influence networks likely to shape their impact on Novartis.
- Maintain assigned areas of Corporate Affairs Intelligence's emerging issues foundation, preserving signals, drivers, issue categories, geographies, policy and regulatory developments, potential inflection points, scenarios, evidence, context, assumptions, methods, findings, and analytical learning for reuse across briefs.
- Collect, structure, validate, and analyze quantitative and qualitative information from diverse sources, including traditional and social media, financial and corporate disclosures, policy and regulatory materials, scientific literature, stakeholder communications, public web content, blogs, forums, and other digital information environments, ensuring evidence is accurate, objective, traceable, and appropriate for the analytical question.
- Synthesize evidence into clear findings and evidence-based preliminary judgments and points of view, distinguishing supported conclusions from assumptions, uncertainties, and questions requiring further analysis or escalation.
- Apply AI-enabled workflows responsibly to improve analytical speed, rigor, and depth; validate AI-generated outputs against trusted evidence; and document improvements to prompts, methods, and workflows.
- Engage Corporate Affairs stakeholders at the project level to gather context, clarify how intelligence may be used, test understanding, and communicate findings while preserving analytical objectivity.
- Strengthen Corporate Affairs Intelligence's collective intelligence by producing objective, evidence-based work; communicating complex ideas clearly; seeking feedback; and collaborating across roles, workstreams, and functions.

Essential Requirements

- Bachelor ' s degree and relevant experience in intelligence, foresight, policy or analytical fields.
- Experience analyzing government, policy and regulatory sources; political and economic reporting; scientific literature; technology and cross-industry developments; and traditional and social media.
- Experience managing analytical work from research planning and evidence collection through validation, synthesis and evidence-based conclusions.
- Ability to identify early signals, trends and implications across political, economic, societal, regulatory, geopolitical and technological developments.
- Experience analysing structured and unstructured information across policy, regulatory, scientific, corporate, media and digital sources.
- Hands-on experience using research, monitoring, data, intelligence or artificial intelligence-enabled tools and workflows.
- Strong analytical thinking and business acumen, connecting external developments to enterprise and Corporate Affairs priorities.
- Ability to communicate complex findings clearly, objectively and effectively to stakeholders

across teams and functions.
- Intellectual curiosity, sound judgement and confidence working independently in complex, evolving and ambiguous environments.

Benefits & Rewards

The salary for this position is expected to range between $98,700.00 and $183,300.00 per year. The final salary offered is determined based on factors like, but not limited to, relevant skills and experience, and upon joining Novartis will be reviewed periodically. Novartis may change the published salary range based on company and market factors. Your compensation will include a performance-based cash incentive and, depending on the level of the role, eligibility to be considered for annual equity awards. US-based eligible employees will receive a comprehensive benefits package that includes health, life and disability benefits, a 401(k) with company contribution and match, and a variety of other benefits. In addition, employees are eligible for a generous time off package including vacation, personal days, holidays and other leaves.
