摘要

The QC Investigations Expert is responsible for leading manufacturing and QC investigation records (DEV, OOS, QE) in support of cell therapy manufacturing operations. This includes execution of thorough root cause investigations, interviewing personnel, hypothesis testing and interpretation of results, authoring investigation reports, identifying corrective and preventive actions (CAPA), and troubleshooting complex problems to support timely release of batches - while maintaining compliance and ensuring quality, safety, efficacy and performance of the products - in close collaboration with cross-functional teams (i.e. QA, Manufacturing, Planning and Release teams)

About the Role

#LI-Onsite

Location: Morris Plains, NJ

3 total positions open for: Sun - Wed (4 x 10hrs) OR Wed - Sat (4 x 10hrs)

Relocation Support: This role is based in Morris Plains, NJ. Novartis is unable to offer relocation support: please only apply if accessible.

Key Responsibilities

- Interview personnel involved with QC events and provide quality insight to complete laboratory investigation reports in 1QEM.

- Review/complete routine cell therapy manufacturing nonconformance/deviation investigations.

- Ensure all investigations are completed in a timely manner. Notify stakeholders of any delays in a timely manner.

- Provide technical support for manufacturing investigations / CAPAs / change controls as needed.

- Handle complex issues and solve problems with minimal guidance.

- Provide support to team members

- Serve as author or technical reviewer of departmental procedures as appropriate.

- Build strong cross-functional and interdepartmental partnerships to ensure seamless execution of investigations and interface closely with different functional organizations, including Quality Assurance teams.

- Present QC Investigations Experts team in cross functional routine (daily/weekly) meetings

Continuous Improvement

- Work with functional teams to propose effective CAPAs, develop CAPA plans and assure CAPA effectiveness.

- Employ lean manufacturing / six sigma principles to continuously improve products, processes and systems.

Compliance

- Assess potential impact and risk to product or process associated changes may have upon change implementation and develop an appropriate mitigation strategy.

- May Initiate change control documentation

- Identify functional area SMEs to perform impact assessments as part of the change management process.

- Support deviation investigation defense during audits and site inspections for QC compliance related inquiries

Key Performance Indicators

- Timely delivery on commitments with and departmental KPIs
- Timely responses and solutions to investigations
- Efficient and flexible usage of the available resources
- Compliance to all relevant company policies and guidelines
- Exhibiting core Novartis values and behaviors and fostering these within the team

Essential Requirements

Education:

Bachelor's degree and 2-4 years of related pharmaceutical / biopharmaceutical work experience, or master ' s degree and 2-3 years of work experience.

Languages:

- English

Experience:

- Extensive experience in a regulated GMP environment, preferably within Quality operations, or in manufacturing in a pharmaceutical or cell therapy company.
- Knowledge of cGMP regulations and quality standards relevant to cell therapy

manufacturing.

- Working experience of deviation investigations utilizing root cause analysis tools.
- Working experience in the CAPA process and ability to identify and verify effectiveness.
- Technical writing skills and ability to collaborate effectively in cross functional teams.
- Proven ability to accurately and completely understand, follow, interpret, apply Global Regulatory and cGMP requirements, and company policies.
- Ability to support health authority inspections.
- Knowledge of data trending and tracking, including use of statistical analysis software a plus.
- Advanced knowledge and implementation of data integrity principles.

Specific Professional Competencies

- Excellent communication, presentation, and interpersonal skills to effectively train diverse

audiences.

- Strong analytical and problem-solving skills.
- Ability to function in a rapidly changing environment & handle multiple priorities.
- Ability to set priorities, manage timelines and effectively react/manage changing priorities.

Ability to work with management (global and site) and support corporate and departmental goals

- Ability to collaborate cross functionally to drive operational and quality excellence.
- Advanced organizational and time management skills.
- Ability to work independently and as part of a team to achieve quality objectives.
- Demonstrated critical reasoning, problem solving, troubleshooting, investigation, and

decision-making skills.

- Communicate effectively with management regarding task completion, roadblocks, and

needs.

- Ability to work collaboratively in a high-paced team environment, meet deadlines and

prioritize work for multiple teams/programs.

The salary for this position is expected to range between **$89,600 and $166,400 per year**. The final salary offered is determined based on factors like, but not limited to, relevant skills and experience, and upon joining Novartis will be reviewed periodically. Novartis may change the published salary range based on company and market factors. Your compensation will include a performance-based cash incentive and, depending on the level of the role, eligibility to be considered for annual equity awards. US-based eligible employees will receive a comprehensive benefits package that includes health, life, and disability benefits, a 401(k) with company contribution and match, and a variety of other benefits. In addition, employees are eligible for a generous time off package including vacation, personal days, holidays, and other leaves.
