摘要

Location: Hyderabad, India
Work arrangement: Hybrid
#LI-Hybrid

We are hiring 2 Specialist AI Engineers

We are looking for a Specialist, AI Engineer to join our team in Hyderabad and contribute to the development and application of innovative informatics and AI solutions supporting Research.

In this role, you will work across scientific data analysis, applications, architecture, systems engineering and technical support. You will help design, develop and enhance informatics solutions that enable scientific teams to make effective use of data and technology.

This opportunity is ideal for someone with strong expertise in AI, informatics and/or informatics systems, combined with an understanding of scientific Research environments and an interest in applying technology to complex scientific challenges.

About the Role

Your responsibilities will include, but are not limited to:

- Design, develop and support AI and informatics solutions for scientific Research.
- Apply technical and professional expertise to address a range of project and system-related challenges, in line with company policies and procedures.
- Support the planning, monitoring and documentation of projects, including the analysis and interpretation of relevant information.
- Collaborate effectively across project teams and with scientific and technical stakeholders to support delivery against project goals.
- Contribute to team and cost-centre goals and objectives.
- Continuously broaden your technical and scientific knowledge through departmental activities, relevant literature and hands-on learning.
- Share knowledge and, where appropriate, provide training and support to junior or new team members.
- Ensure timely execution of projects and data requests, with a strong focus on quality and stakeholder needs.
- Report technical complaints, adverse events and special case scenarios related to Novartis products within 24 hours of receipt.
- Support the distribution of marketing samples, where applicable.

What you ’ ll bring to the role

- Relevant experience in **AI engineering, informatics, scientific computing, data science, software engineering or a related technical discipline**.
- Good understanding of informatics and/or informatics systems, ideally within a scientific, pharmaceutical, healthcare or Research environment.
- Experience working with scientific data, applications, technical platforms or data-driven solutions.
- Strong analytical and problem-solving skills with the ability to translate requirements into practical technical solutions.
- Ability to collaborate effectively across multidisciplinary teams and communicate with both technical and non-technical stakeholders.
- A commitment to continuous learning and staying current with developments in AI, informatics and emerging technologies.
- Strong focus on quality, timely delivery and stakeholder outcomes.

Why consider this opportunity?

This is an opportunity to apply your AI and informatics expertise in a scientific environment where technology and data can help enable Research. You will work alongside multidisciplinary teams, contribute to meaningful technical solutions and continue developing your expertise through challenging and varied projects.

Benefits and Rewards

At Novartis, we are committed to helping our people thrive personally and professionally. Our India benefits offering includes a range of programs designed to support your health, wellbeing, financial security and work-life balance.
