摘要

Help bring high-quality biologic medicines from manufacturing to the patients who need them. As a BioProcess Engineer II / III, you ’ ll play a hands-on role in downstream and fill-finish manufacturing at our Durham site, supporting purification, aseptic fill-finish, visual inspection, packaging, and related production activities. You ’ ll work closely with Quality and cross-functional partners to troubleshoot equipment, investigate deviations, strengthen processes, and ensure products are manufactured safely, compliantly, and according to plan. This is an opportunity to deepen your technical expertise while making a meaningful impact in a current Good Manufacturing Practice (cGMP) manufacturing environment. The level of the role will be determined by the years of relevant experience.

The salary for this position is expected to range between **$66,800 and $124,000 per year**. The final

salary offered is determined based on factors like, but not limited to, relevant skills and experience, and upon joining Novartis will be reviewed periodically. Novartis may change the published salary range based on company and market factors. Your compensation will include a performance-based cash incentive and, depending on the level of the role, eligibility to be considered for annual equity awards. US-based eligible employees will receive a comprehensive benefits package that includes health, life, and disability benefits, a 401(k) with company contribution and match, and a variety of other benefits. In addition, employees are eligible for a generous time off package including vacation, personal days, holidays, and other leaves.
