摘要

-Identifies and validates molecular targets that play a key role in a particular disease process. Studies origin, relationship, development, anatomy, functions, and chemicalprocesses of living organisms. Analyzes materials to determine their toxic or nontoxic properties, binding and efficacy. Isolates or purifies analyses, and identifies hormones,minerals, proteins, and/or cultures of microorganisms to determine their biological properties. Examines and conducts research on chemical aspects chemistry of cells andcell division. Requires an understanding of one or more of the following: molecular biology, biochemistry, microbiology, cell biology, biophysics, virology and/or immunology.May identify and produce small quantities of new drugs, pharmaceutical compounds and/or nutrients. May develop an assay which employs in-vitro and/or in-vivo biological and immunological systems. May experiment with animals and tissue to determine the effect of new drug compound entities utilizing in-vivo, in-vitro and ex-vivo models on cells, tissues and whole animal systems. -Implements and provides input to enable a division‐wide strategy for new discoveries and/or early development. Enables impactful experimentation, project initiation, and decision making/progression by leading and empowering an interdisciplinary team of technical experts, broad scientific leaders, and lab associates or by creating and driving scientific, functional and technical communities surrounding own area of deep expertise and thought leadership. Connects and inspires others around the Novartis mission.

About the Role

Key Responsibilities:

- Leads a cross‐disciplinary team or brings together a broad functional community.
- May serve on leadership teams and/or decision boards to review projects and programs, assess progress, and provide multi‐directional input to progress the Division pipeline; shares and communicates key information to team.
- Drives continuous improvement and provides deep insight with collaborators within area of expertise, and/or works with own team to build scientific, technical or early development expertise and added value within department and across Division.
- Sets talent, leadership development, and culture priorities for own team or sets priorities for matrix team or functional community , in alignment with Novartis People Strategy and in close collaboration with leadership team colleagues.
- Co‐create top research organization to be one step ahead the market, contribute to long‐term talent and succession planning and/or collaborate to define talent attraction and development model surrounding own area of expertise.
- Sought after mentor and role model for talent development, coaching, and performance discussions across the organization.
- Reporting of technical complaints / adverse events / special case scenarios related to Novartis products within 24 hours of receipt -Distribution of marketing samples (where applicable)

Novartis Biomedical Research in China
