NOVARTIS

Expert Data Science I/II

Job ID
REQ-10093531

十一月 26, 2026

Slovenia

摘要

Location: Menges, Slovenia #onsite

Role Purpose:
Our R&D unit in Menge š is looking for a highly skilled computational scientist to join us and help us develop a diverse portfolio of biotherapeutic modalities.

As a Expert Data Science you must demonstrate a broad and in-depth understanding of protein structure prediction, molecular interactions, molecular dynamics simulations, and protein and nucleic acid structure analysis to support the design, optimization, and developability assessment of various biologics modalities covered by Novartis Biomedical Research and Development units, ranging from traditional antibodies to advanced biologics formats and mixed modalities.

We offer a stimulating work environment, ample opportunities for growth and development, and the chance to make a significant impact on the future of medicine. If you are a motivated and talented scientist with a passion for biomedical research, we invite you to apply and become a part of our dynamic team at Novartis.

Na š a enota za raziskave in razvoj v Meng š u i š č e izjemno usposobljenega ra č unskega znanstvenika ali znanstvenico, ki se nam bo pridru ž il/-a in nam pomagal/-a razvijati raznolik portfelj bioterapevtskih modalnosti.

Kot Expert Data Science morate izkazati š iroko in poglobljeno razumevanje napovedovanja strukture beljakovin, molekulskih interakcij, simulacij molekulske dinamike ter analize struktur beljakovin in nukleinskih kislin, da boste lahko sodelovali pri na č rtovanju, optimizaciji in ocenjevanju razvojne primernost razli č nih modalnosti biolo š kih zdravil, ki jih pokrivajo enote Novartis Biomedical Research in Development, od klasi č nih protiteles do naprednih biolo š kih formatov in me š anih modalnosti.

Ponujamo spodbudno delovno okolje, obilo prilo ž nosti za rast in razvoj ter mo ž nost pomembnega prispevka k prihodnosti medicine. Č e ste motivirani in nadarjeni znanstvenik ali znanstvenica s strastjo do biomedicinskih raziskav, vas vabimo, da se prijavite in postanete del na š e dinami č ne ekipe v podjetju Novartis.

About the Role

Key Responsibilities:

- Contribute to biologics discovery and innovation programs by applying computational structural approaches to support candidate design, selection, and optimization across the discovery pipeline.
- Apply, develop, and critically evaluate computational structural modelling methods, assessing their suitability, limitations, and predictive performance for specific scientific questions.
- Collaborate closely with experimental scientists, providing computational expertise and clearly communicating results, uncertainties, limitations, and recommendations to project teams and supporting the broader adoption of effective methods across the organization.
- Integrate sequence, structural, experimental, and project data to build predictive models, formulate testable hypotheses, and generate actionable design recommendations.
- Contribute to the design, implementation, and continuous improvement of reproducible bioinformatics and molecular-modelling tools and workflows for sequence and structure analysis.

Minimum Requirements - What you will bring to the role

- MSc degree in a theoretical or computational discipline, such as Applied Mathematics, Computer Science, Physics, Chemistry, Bioinformatics or a closely related quantitative field with at least 2 years of relevant work experience

- Demonstrated expertise (evidenced by peer-reviewed publications) in computational structural biology and molecular modelling
- Experience in protein structure prediction and analysis, protein-protein and protein-ligand interactions, sequence-structure analysis, and structure-based design, including hands-on molecular dynamics simulations and associated analysis methods.
- Proficiency with relevant molecular modelling and structural bioinformatics tools, such as MOE, Schr ö dinger, Rosetta, or comparable platforms.
- Proficiency in Python or a comparable scientific programming language, together with experience using relevant bioinformatics databases and computational tools
- Strong ability to critically analyze and interpret complex sequence, structural, simulation, and experimental data and translate the results into testable hypotheses and actionable design recommendations
- A creative and scientifically rigorous approach to developing computational strategies, addressing complex research questions, and advancing biologics discovery through innovative methods
- Excellent scientific communication and teamwork skills, with the ability to work effectively in multidisciplinary and international project teams
- Fluency in English (oral/written)

Benefits & Rewards

At Novartis, we ' re committed to reimagining medicine together - and rewarding the people who make it happen.

Expected Annual Base Salary Range for role: € 27,160 to € 50,440

The base salary offered is determined based on gender-neutral objectives, such as relevant skills, competencies and experience in accordance with the Novartis pay setting policy and upon joining Novartis will be reviewed periodically.

In addition to your base salary, you may be eligible for a performance-based bonus depending on certain performance parameters.

The rewards of being part of our team go far beyond base pay and incentives. We also offer a variety of competitive benefits in kind to help you thrive personally and professionally, such as insurance plans, retirement plans, wellbeing resources and global recognition programs. In addition, we provide flexible and hybrid working options, where possible, and minimum 14 weeks paid parental leave.

Klju č ne odgovornosti:

- Prispevajte k programom odkrivanja in inovacij na podro č ju biolo š kih zdravil z uporabo ra č unskih strukturnih pristopov, ki podpirajo na č rtovanje, izbiro in optimizacijo kandidatov v celotnem razvojnem cevovodu odkrivanja.
- Uporabljajte, razvijajte in kriti č no vrednotite ra č unske metode strukturnega modeliranja ter ocenjujte njihovo primernost, omejitve in napovedno zmogljivost za posamezna znanstvena vpra š anja.
- Tesno sodelujte z eksperimentalnimi znanstveniki, zagotavljajte ra č unsko strokovno znanje ter jasno sporo č ajte rezultate, negotovosti, omejitve in priporo č ila projektnim ekipam, s tem pa podpirajte š ir š o uporabo u č inkovitih metod v celotni organizaciji.
- Povezujte podatke o zaporedjih, strukturah, eksperimentih in projektih za izgradnjo napovednih modelov, oblikovanje preverljivih hipotez in pripravo uporabnih priporo č il za na č rtovanje.
- Prispevajte k na č rtovanju, izvedbi in nenehnemu izbolj š evanju ponovljivih bioinformatskih orodij in orodij za molekulsko modeliranje ter delovnih tokov za analizo zaporedij in struktur.

Minimalne zahteve - kaj boste prinesli na to delovno mesto

- Magisterij s teoreti č nega ali ra č unskega podro č ja, kot so uporabna matematika, ra č unalni š tvo, bioinformatika, fizika, kemija ali sorodno kvantitativno podro č je, z vsaj 2 letoma ustreznih delovnih izku š enj
- Dokazano strokovno znanje (izkazano z recenziranimi objavami) na podro č ju ra č unske strukturne biologije in molekulskega modeliranja
- Izku š nje z napovedovanjem in analizo strukture beljakovin, interakcijami beljakovina-beljakovina in beljakovina-ligand, simulacijami molekulske dinamike, analizo zaporedje-struktura ter na č rtovanjem na osnovi structure, ter prakti č ne izku š nje s simulacijami molekulske dinamike in pripadajo č imi analiti č nimi metodami.
- Obvladovanje ustreznih orodij za molekulsko modeliranje in strukturno bioinformatiko, kot so MOE, Schr ö dinger, Rosetta ali primerljive platforme.
- Obvladovanje programskega jezika Python ali primerljivega znanstvenega programskega

jezika ter izku š nje z uporabo ustreznih bioinformatskih podatkovnih zbirk in ra č unskih orodij

- Izrazita sposobnost kriti č ne analize in interpretacije kompleksnih podatkov o zaporedjih, strukturah, simulacijah in eksperimentih ter njihovega prevajanja v preverljive hipoteze in uporabna priporo č ila za na č rtovanje

- Ustvarjalen in znanstveno strog pristop k razvoju ra č unskih strategij, re š evanju kompleksnih raziskovalnih vpra š anj in pospe š evanju odkrivanja biolo š kih zdravil z inovativnimi metodami

- Odli č ne komunikacijske ve š č ine na znanstvenem podro č ju in sposobnost timskega dela, vklju č no z u č inkovitim delom v multidisciplinarnih in mednarodnih projektnih ekipah

- Teko č e znanje angle š č ine (ustno/pisno)

Ugodnosti in nagrade V podjetju Novartis smo zavezani k skupnemu preoblikovanju medicine - in k nagrajevanju ljudi, ki to omogo č ajo. Predvideni razpon letne osnovne pla č e za to delovno mesto: Dodajte celoten primerjalni razpon v skladu s sistemom Workday, npr.: od 27,160 € do 50,440 € Ponujena osnovna pla č a se dolo č i na podlagi ciljev, ki ne upo š tevajo spola, kot so ustrezna znanja, kompetence in izku š nje v skladu s politiko dolo č anja pla č v podjetju Novartis, po vstopu v podjetje Novartis pa se bo redno pregledovala. Poleg osnovne pla č e ste lahko upravi č eni do bonusa, ki temelji na uspe š nosti, odvisno od dolo č enih parametrov uspe š nosti. Nagrade za sodelovanje v na š i ekipi segajo dale č onkraj osnovne pla č e in spodbud. Ponujamo tudi vrsto konkuren č nih ugodnosti v naravi, ki vam pomagajo pri osebnem in poklicnem razvoju, kot so zavarovalni na č rti, pokojninski na č rti, viri za dobro po č utje in globalni programi priznanj. Poleg tega zagotavljamo fleksibilne in hibridne mo ž nosti dela, kjer je to mogo č e, ter najmanj 14 tednov pla č anega star š evskega dopusta.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients ' lives. Ready to create a brighter future together? https://www.novartis.com/about/strategy/people-and-culture
